

PERCEPTIV®

CONTRACT ANALYSIS

Perceptiv helps financial institutions manage risk and profit by automatically extracting and organizing key terms held in Over-the-Counter (OTC) derivatives agreements, ensuring traders and compliance officers always have ready access to complete, current, and accurate data.

AUTOMATED ANALYSIS

Find the right terms. Perceptiv automatically extracts detailed information from unstructured text in trade documents (e.g. Repurchasing, Securities Lending and Borrowing, Prime Brokerage, Futures and Options) and converts it to normalized, structured data. The resulting content provides heightened accuracy with immediate access to inform trade pricing, collateral maximization, and reporting for regulatory compliance.

CONFIDENT COMPLIANCE

Meet your obligations. Tighter regulations (e.g. Dodd-Frank, EMIR, BCBS) require banks to improve their understanding of asset and counterparty exposures, as well as to provide daily reporting of derivatives trades. Perceptiv provides banks the most accurate, convenient, and reliable means available to satisfy these obligations while identifying profit and cost saving opportunities.

BETTER DATA, LOWER COSTS

Reduce your spend. Manual collection of legal and eligibility data from OTC derivatives agreements is costly and time consuming, often resulting in multiple instances of inaccurate or incomplete data. Perceptiv's straight-through, intelligent processing provides more granular, complete, and accurate information—faster and at a lower cost than traditional methods.

“Due to increased regulatory demands and the huge growth in information...understanding the costs of collateral and optimizing capital allocation...is a strategic imperative.”

Jason Williams
Director, Deutsche Bank

CONNECTING TRADERS AND COMPLIANCE OFFICERS WITH TRUSTED DATA TO MAKE BETTER DECISIONS

BUSINESS INTELLIGENCE FOR TOTAL INSIGHT

Gain visibility from trade data with integrated Business Intelligence delivered through a user-friendly interface, improving organizational understanding of asset and counterparty exposures. Leverage visualizations for assessing and reporting performance, identifying cost saving opportunities, reacting swiftly to regulatory inquiries, optimizing trade life cycles, and streamlining operations.

SIMULTANEOUS VIEWING OF DATA AND SOURCE

Perceptiv's unique ability to retain a link between each original document and its extracted data enables simultaneous viewing of the key data points and source documents, while a full amendment history ensures only the most current information is relied upon. This elicits complete confidence in the detailed information gleaned from counterparty contracts.

FLEXIBLE DISTRIBUTION MODELS FROM A MARKET LEADER

Perceptiv is available as a subscription-based, pay-as-you-go cloud service—securely hosted by Recommind in state-of-the-art data centers around the globe—or deployed on your own premise by Recommind's expert personnel. Recommind is a leader in information intelligence solutions for eDiscovery and investigations, contract analysis, and enterprise search.
