opentext™ | InfoArchive

OpenText™ InfoArchive is an Enterprise Information Archiving Platform that unlocks all types of data trapped in siloed applications. This means you can lower IT costs, preserve compliance, and put application data to work.

What customers are saying

" Experiencing **faster time to value** than expected, we also appreciate the **new drag-and-drop interface.**

Wake Forest

" It took us only **25 days** to fully deploy due to the **ease of implementation.**

Techint Group

" Our clinical providers are thrilled with the **seamless access to patient data** which they have as a result of **OpenText™ Clinical Archiving.**

Lahey Health

" We now comply with **regulatory requirements** and archive data associated with **8 billion** credit card transactions yearly.

Credit Agricole Group

" We realized an **immediate savings** of **$5 million** per year while meeting the regulatory requirements.

Bank of Montreal

Flexibility
InfoArchive optimizes data and content ingestion to meet the specific requirements of any source application.

Agility
Simple by design, InfoArchive is easy to learn and adopt without having specialized expertise.

No more silos
InfoArchive eliminates silos, revitalizing and orienting data to user needs.
