

# Enterprise Messaging

Enterprise Messaging provides enterprise-grade email, instant messaging, and file sharing with unparalleled security, archiving, and disaster recovery.

## Enterprise Messaging at a Glance:

### ■ Business Email:

Secure email, instant messaging, scheduling, contact management, and task management.

### ■ File Sharing:

Filr provides a different approach to enterprise protection, one that offers true enterprise file sharing, real-time collaborative co-editing, and secure mobile access.

### ■ Unified Archiving:

Complete oversight of your messaging system by archiving all messaging data.

### ■ Security:

Antivirus, anti-spam, cybercrime protection, DDoS protection, and porn blocking.

### ■ Disaster Recovery:

Ensures that your messaging system always stays up and running.

## Secure Collaboration

OpenText™ Enterprise Messaging provides secure email, instant messaging, scheduling, contact management, and task management, all with mobile synchronization.

## File Sharing

OpenText™ Filr Advanced allows users to simultaneously and collaboratively edit files and see each other's changes in real time. Users love it because it makes collaboration effortless, and administrators love it because they have total control to restrict copy/paste, watermark content with user's email addresses, and keep users from downloading sensitive data from the Filr repository while stilling allowing them to access and edit.

## Complete and Compliant Archiving

Enterprise Messaging enables you to have complete oversight and visibility of your messaging system by archiving all messaging data into a single, unified archive. This includes emails, appointments, files, and attachments. With built-in NetIQ eDiscovery by OpenText tools you can access, search, place litigation holds, tag, print, forward, save, redact, and export archived data.

## Unparalleled Security

Enterprise Messaging includes unparalleled security for your messaging system and network. This includes functionality for inbound and outbound protection, antivirus, anti-spam, cybercrime protection, DDOS protection, and porn blocking with built-in image analysis. Enterprise Messaging uses the latest technology to keep your messaging system protected,

including protection for the messaging transfer agent (MTA), post office agent (POA), internet agent (GWIA), WebAccess, and Mobility.

## Secure Instant Messaging

Communicate in real time with your co-workers through Enterprise Messaging. Employees can collaborate wherever they are, regardless of workstation or device. It also provides presence indicators to show when users are online, busy, or away from their desks. Built-in archiving can automatically save important conversations for future reference too. Instant messaging gives you real-time access to your colleagues so you can make decisions and address issues quickly.

## Mobile Access

Enterprise Messaging offers a full set of options to stay connected from any mobile device. You can access email from your iPhone, iPad, Android, BlackBerry, Windows phone, tablet, or other ActiveSync-enabled devices. You also have archive access from your iOS or Android device, via the archive mobile app. Plus, you can access email or the archive from any web-enabled device for ultimate mobility.

## Disaster Recovery

Enterprise Messaging ensures that your messaging system is always ready to go. Enterprise Messaging delivers quick message restoration as well as hot backups of post offices and domains, ensuring that critical data is always current and available. Your backup also doubles as a failover system, in case your live messaging system goes down.

Everything you need to provide secure, compliant  
enterprise messaging to your organization.  
Communicate and collaborate with ease!
