

# How do enterprises feel about their AppSec?

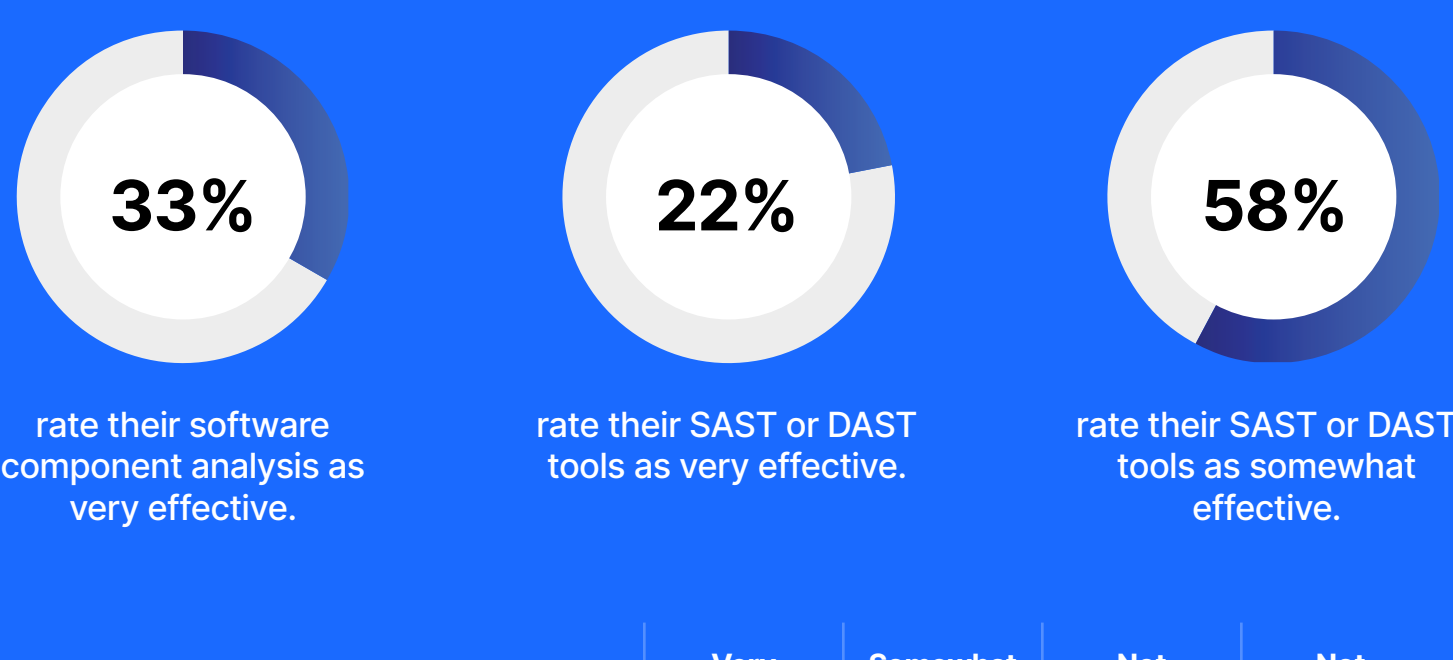

For our latest report with Dark Reading, we asked enterprises about their AppSec priorities and confidence level. Here are just a few highlights from their responses.

## Why DevSecOps in 2024?

## How do orgs rate their AppSec tools?

	Very effective	Somewhat effective	Not effective	Not used
Dependency scanning/software component analysis (SCA)	33%	41%	15%	12%
Manual application penetration testing	29%	53%	6%	12%
Dynamic code scanning/dynamic application security testing (DAST)	22%	58%	2%	18%
Static code scanning/static application security testing (SAST)	22%	58%	6%	14%
Mobile application security testing (MAST)	19%	38%	6%	37%
Interactive application security testing (IAST)	18%	41%	8%	33%
Anomaly detection tools	18%	62%	6%	14%

## How confident do orgs feel?

The confidence to detect and defend against vulnerabilities remains frightfully low:

## When it comes to AppSec, how knowledgeable is the average developer in your org?

Learn more about the state of enterprise AppSec and how to strengthen your code security
