

Needs Assessment Checklist

Start your modernization journey with a basic needs assessment to understand the current state of your legacy applications.

TIP!

Complete an internal survey

OpenText recommends surveying employees on how they are using your legacy application to capture:

- Real-life use cases and challenges
- Employee satisfaction and experience with the system
- Areas where improvements will have the greatest impact
- How employees prefer to work to optimize productivity

Which department(s) currently use Box?

Notes

How is it being used?

Notes

In what business processes is Box integrated?

Notes

What type of documents are stored and managed within Box?

Notes
