

OpenText Accessibility Conformance Report

Revised Section 508 Edition

(Based on VPAT® Version 2.4Rev)

Name of Product/Version: OpenText Exstream Empower Editor v23.x

Report Date: April 2023

Product Description: With Exstream Empower Editor, organizations enable users on the front lines of customer interactions to form strong relationships with customers and prospects, providing them with a pure, thin-client interface that is easy to use and ensures compliance for critical correspondence, including letters, notices, emails, proposals, quotes and invoices. Using a standard web browser, without any additional download or installation, Exstream Empower Editor lets users personalize communications in a controlled environment. It responds to user input by automatically populating communications with approved content. Since the editor is part of Exstream, it can access business, legal and marketing data and content from multiple sources to deliver communications to virtually any print or electronic channel. Exstream provides a single design environment to create structured, on-demand and interactive applications for use with desktop or browser-based clients. Design objects and variable rules can be created once and reused in multiple applications for multichannel delivery, significantly reducing time to market for interactive communications.

The keyboard navigation needs to be opened to have the full functionality. The content being created may include accessible controls and commands as well.

Evaluation Methods Used: Manual and automated testing based on the DHS TTV5 testing protocols.

Notes/Unique to this Testing	The VPAT testing was semi comprehensive and not scenario driven. Log in, all ribbons and toolbars were tested. The application is very accessible, and effort was made to follow normal operating cues and trails throughout the application.

For purposes of this test, “Supports” means largely satisfies, and “Partially Supports” means satisfies any percentage above zero.

The enclosed data documents a product’s conformance with VPAT accessibility standards from Section 508 of the Rehabilitation Act of 1973, and 29 U.S.C. § 794(d). Data in this report reflects results which were obtained under a controlled environment. As such, duplication of tests may yield different results.
