Achieving mobile banking excellence

Ensure comprehensive web and mobile app testing capabilities across multiple devices—without requiring testers to have physical access to them.

Deliver cutting-edge banking services with rapid, reliable, software development powered by AI.

User benefits

- 90% defect reduction
- Eliminated manual regression testing
- Automated tests
- Reduced time to market

Benefits for the Banking, Financial Services and Insurance industry

- Enables testing of all functions on hundreds of different mobile devices
- Delivers test environments to remote teams at least 10 times faster than before
- Reduces testing costs significantly while increasing quality and decreasing time-to-market
- Provides comprehensive evaluation of testing for improved speed and efficiency
- Enables widespread automation of testing for improved speed and efficiency
- Provides detailed reporting of test runs
- Enables test cases to be written in a reusable way
- Tracks software defects in relation to test cases and requirements

Through our digital transformation, supported by Micro Focus [now part of OpenText] solutions, we have reduced our defects by 90 percent, while realizing a cost reduction of 21 percent using next-generation testing processes.”

Luis Dujovne
Former Head of DevOps and Quality Assurance (QA)
Banco de Credito (BCI)

"We compared Micro Focus [now part of UFT Digital Lab with other automation tools and found it offers significant advantages. We can do both iOS and Android® testing on a single platform. And, UFT Digital Lab’s user interface is very easy for our testers to operate.”

Hailiang Huangfu
Test Manager
Shanghai OnStar

About us

The UFT Digital Lab enterprise-testing solution enables developers and testers to develop, debug, heat, monitor, and optimize apps and tests on any mobile or web device.
