SOLUTION OVERVIEW

OpenText[™] Core

Rapidly deploy complete content management in the cloud

Boost productivity - and user adoption

Meet new challenges easily

Get up and running fast Information access, use and governance has always been a major challenge for organizations, but an increasingly hybrid workforce has multiplied that challenge exponentially. The rate of change is only accelerating, and organizations need to be able to pivot and adapt faster using technology solutions that are quicker and simpler to deploy, configure, manage and use.

OpenText[™] Core is a fast-deploying Software as a Service (SaaS) solution that delivers simple, agile and secure cloud-based content management. It is easy to manage, requiring little-to-no IT involvement and providing automatic, regularly scheduled updates.

Core is the only SaaS content services platform that integrates into crucial business process applications, including SAP S/4HANA® Public Cloud, Salesforce® and Microsoft 365® to maximize employee productivity, accelerate business processes and enhance governance.

opentext

Reduce costs

Core enables organizations to reduce or eliminate application costs and free up valuable IT resources with a comprehensive cloud content management solution that addresses the entire content lifecycle and delivers automatic and transparent governance.

Boost productivity and user adoption

Core provides a 360-degree view of content and related processes in a single modern user interface that allows users to complete their daily tasks while remaining in familiar business applications. With Business Workspaces, nontechnical users can use pre-built templates to create dedicated workspaces and aggregate related content, data, people and tasks, eliminating inefficiencies and enhancing productivity.

Meet new challenges easily

Core enables organizations to pivot as needed to quickly address new line-ofbusiness, department and industry use cases. A flexible, scalable and agile cloud solution, Core enables customers to quickly add new capabilities that extend and integrate with existing OpenText solutions. These applications are built to flex and scale with new user requirements and business use-cases while keeping data secure and centralized on one platform.

Core is for organizations who want a turnkey product to process and manage the content lifecycle in the cloud. Unlike other generic content management platforms, Core is a specialized solution designed around templates that have been aligned to the needs of the business. As information management challenges expand in size and complexity, Core provides fast, effective and easy solutions to enhance critical business processes.
