Additional License Authorizations

For OpenText™ Structured Data Manager software products

This Additional License Authorizations document (“ALA”) sets forth the applicable License Options and additional specific software license terms that govern the authorized use of the Structured Data Manager (“SDM”) software products specified below, and are part of the applicable agreement (i.e., Micro Focus End User License Agreement; and/or any separate agreement that grants Licensee a license to such products, e.g., Customer Portfolio Terms or other Master Agreement; and/or Quotation) (the “Applicable Agreement”). Capitalized terms used but not defined herein shall have the meanings set forth in the Applicable Agreement. All products below are delivered electronically, and as such, any reference to software delivery methods that are stated on the purchase order other than electronic are void.

Products and Product Suites

Products

Product Line	Product	Non-production software class*	Term License Non-production software class (if available)
Structured Data Manager	Structured Data Manager (Voltage Structured Data Manager)	Class 1	Class 3
Structured Data Manager	Database Activity Monitoring (Voltage Database Activity Monitoring)	Class 1	N/A

*Non-production use rights, if any, can be found at opentext.com/about/legal/software-licensing.

**Specific parts of this product offering have Non-Production licenses for Development and Test and for Disaster Recovery purposes, those are Class 2; all other parts of this product offering are Class 3.

Definitions

Capitalized terms not otherwise defined in this ALA document are defined in the governing agreement.

Term	Definition
Application	A single module or service, or a collection of integrated software modules or services, or a distinct process designed to perform a specific single Organization Function.
Database	A container that stores application data including table structure, stored procedures, and other functionality that runs on a Database Instance.
Database Instance	A software application that has the sole purpose of acting as a container that hosts and executes one or more Databases.
Device	An addressable entity, physical or virtual, including but not limited to router, switch, bridge, hub, server, PC, laptop, handheld device, or printer that resides within the range defined for interrogation and asset tracking.
Encryption	A key-based, cryptographic transformation of sensitive data into a non-sensitive de-identified form (ciphertext).
Implementation	An installation of the software on a single Server, or installed on a cluster of Servers which work together as a single installation of the software.
Installation Kit	A collection of software products in ready-to-install form.
Instance	Each implementation of the software installed on a either a Physical or a Virtual Server.
Server	Any designated computer system in which an Instance or Instances of the software is installed.
Source Production Database Instance	A database which needs to be archived, extracted or processed and is represented by a connection to a running RDBMS on a virtual or physical Server, regardless of whether the database is collocated with other databases in a physical Server.

License Options

Structured Data Manager

Structured Data Manager is licensed by Source Database Instance. If multiple Database Instances exist on one physical Server, each Database Instance must have a separate license. For example, if three Database Instances are installed on one physical Server and only one will be archived with Structured Data Manager, only that one Database Instance is considered as a Source Database instance and requires a license. Licenses cannot be transferred between production Databases.

Database Activity Monitoring

Database Activity Monitoring software as indicated in the table below is licensed in accordance with the following License Metric: Server and Database Server

Name	License metric
Database Activity Monitoring Server	Unit
Database Activity Monitoring per Database Server	Database Server

Database Activity Monitoring Server Is licensed by a Unit. Each independent installation of Database Activity Monitoring Server is a unit and required to have a license for a Database Monitoring Server.

Database Activity Monitoring per Database Server is licensed by Database Server. Each Database server monitored by Database Activity Monitoring requires a Database Activity Monitoring Server license per Database.

Additional License Terms

Term
A. Any licensing terms designated as being of Voltage Security Inc. that may be embedded in the software are inapplicable in their entirety.
B. Software contains software and associated specifications licensed from third parties that are confidential to, and trade secrets of, such parties. You will not take any action other than to Use it as authorized under the agreement as part of the software products and will not disclose it to third parties.
