

OpenText Advisory Services

OpenText offers strategic advisory services turning your vision into an executable dynamic strategy that will transform your company into an intelligent, connected, secured enterprise

Benefits

Clear **vision** to maximize alignment of information management with business goals

Roadmap to achieve the vision and value realization

Unlock the **value of AI**

Leading practice **information management solution architecture framework**

Information architect as your **designated success advisor**

OpenText understands our customer's investment in our solutions are significant and it's our responsibility to ensure we partner with you to achieve demonstrable business objectives, benefits, and project success. In our experience, organizations commonly struggle to address these questions:

- What else can we do with the information management platform? How can we **derive more value** out of your solution?
- How can we best support **digital transformation** and **optimize business outcomes** across our organization?
- Will our current approach to information management minimize both **cost and risk**?
- How can we **actively manage** continuous success with the OpenText information management platform?

OpenText is the market leader in information management with more than 30 years of experience delivering success to customers using highly integrated information management and critical business solutions.

Clear vision to maximize alignment of information management with business goals

OpenText Advisory Services brings your business objectives and priorities into focus as an information management vision.

The vision underpins a value realization framework—including a business solutions roadmap and a value measurement regime based on your business KPIs, which allow you to evaluate the value your information management initiatives deliver to your business.

Roadmap to achieve the vision and value realization

Informed by the information management vision, OpenText prepares a dynamic roadmap describing information management initiatives with timelines, tangible outcomes, and predictive business value.

Value realization measures—business KPIs identified in consultation with your team—provide a feedback mechanism for ongoing refinement of the roadmap.

Unlock the value of AI

Get a clear, actionable path toward AI integration that delivers measurable business value. Our experts will assess how AI can enhance and optimize industry-specific business processes, drive efficiency, and improve decision-making.

Your value

Clear information management vision

- Maximize alignment with related initiatives towards a common mission and goals
- Handle risks and challenges swiftly and proactively
- Understand the opportunities ahead
- Identify best-for-purpose solutions with foresight and insight
- Proactively prepare your business for changes to achieve the vision

Roadmap to achieve vision

- Establish an agile transformation strategy
- Help your workforce navigate a changing culture
- Empower users to adopt new innovative ways of working
- Track bottom-line business contributions and improvements continuously
- Evolve your operating models business needs change

Best practice solution architecture blueprint

- Create new business models or processes
- Blueprint for foundational solution architecture supporting initiatives derived from the information management roadmap
- A governance model to measure outcomes and business value
- An IT operations framework to guide future investments
- Prescriptive guidance to support achievement of business outcomes

Process Manager AP
innogy SE

“...OpenText is a real partner...not only the knowledge of the application,...they knew how to deliver.”

Head of IT
Pharmascience

Information management solution architecture framework: A foundation to achieve your business outcomes

The solution architecture framework underpins the information management program, outlining how each solution helps realize business results. A business-centric solution architecture framework holistically addresses key aspects of implementation, user adoption, and operation.

Information architect: Your designated success advisor

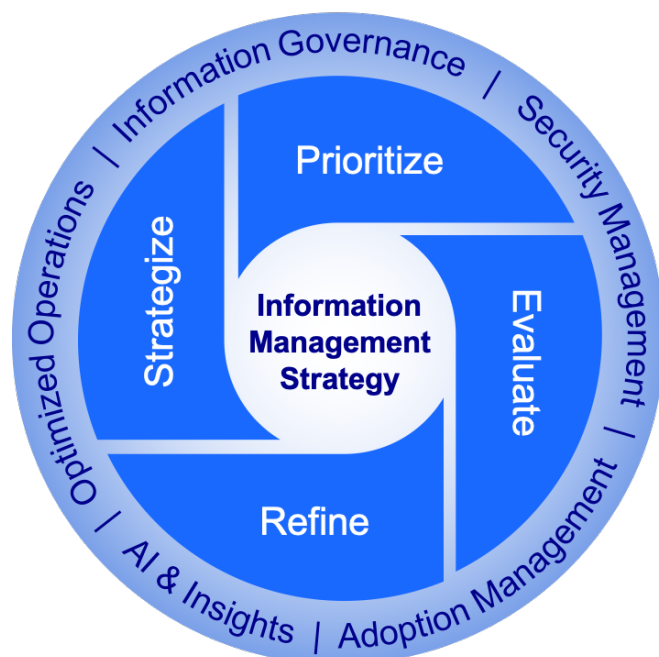

A designated resource leading the program, this principal consultant brings industry and business thought leadership with strong OpenText solution knowledge and unparalleled experience. A leader who knows your team and your business, they facilitate consultations and provide prescriptive advice.

Your point person is supported by an executive sponsor, a program manager, and our global team of subject matter experts, all engaged to contribute to the information management strategy.

Teaming for success is critical. Your leaders and experts provide business context and organizational direction to your priorities, helping to establish the vision and mission.

Maximum value comes from a wider field of view, considering aligned domains such as digital experience, AI and analytics, and security management. Taking a broad view of information management as a transformational force for your business, we advise our customers and implement enterprise-class solutions to meet a wide range of use cases in private and public organizations globally.
