

OpenText Identity Manager: What's your version?

Comparing OpenText™ Identity Manager versions and offerings

Product features	Feature benefits	24.4 (v4.10)	4.9	4.8	4.7	4.6	4.5
Monitoring, auditing, and compliance	Task history viewing in identity applications: Administrators and users designated as approvers can now view their actions on tasks from the Identity Applications dashboard	✓					
Monitoring, auditing, and compliance	Real-time user monitoring: Observe user activities in real-time using readily available, out-of-the-box dashboards	✓	✓				
Monitoring, auditing, and compliance	System overview dashboard: Visualize events related to edirectory	✓	✓				
Monitoring, auditing, and compliance	Audit dashboard: Explore user events and actions using an intuitive and flexible user interface	✓	✓				
Monitoring, auditing, and compliance	Reporting: Correlate data from various sources and entities, including pre- and post-processed data	✓	✓				
Monitoring, auditing, and compliance	*Workflow control: Monitor provisioning and deprovisioning workflows, including role-based access	✓	✓				
Monitoring, auditing, and compliance	*Security dashboard: Track security events in real time and conduct forensic analysis on both current and past data	✓	✓				
Monitoring, auditing, and compliance	*Predefined and customizable reports: Select from a range of more than 20 predefined reports with tailored customization options to align with your needs and compliance requirements	✓	✓				
Monitoring, auditing, and compliance	*Time Machine history browsing: Explore user snapshots, service journal, and historical data. Compare and filter object states across different timelines, export data in CSV, or LDIF format	✓	✓				

Product features	Feature benefits	24.4 (v4.10)	4.9	4.8	4.7	4.6	4.5
Monitoring, auditing, and compliance	*ACDI system health dashboard: Crucial for monitoring overall system health (disk space, RAM, CPU) and customizable to suit specific needs	✓	✓				
Powerful process automation	Automated identity console configuration to help reduce manual setup and improve efficiency in system development	✓					
Powerful process automation	Form renderer based on updated forms I/O libraries	✓	✓				
Powerful process automation	Enhanced and flexible form components	✓	✓				
Powerful process automation	New Workflow Form Builder	✓	✓	✓			
Powerful process automation	Add workflow to roles and resources	✓	✓	✓			
Powerful process automation	Workflow engine as a separate service	✓	✓	✓			
Powerful process automation	Managing the state of in-progress workflows	✓	✓	✓			
Powerful process automation	Support for creating forms using the new Workflow Form Builder	✓	✓	✓			
Powerful process automation	Support for email-based approval	✓	✓	✓	✓	✓	
Powerful process automation	Identity approvals	✓	✓	✓	✓	✓	✓
Performance flexibility	Support for Red Hat Enterprise Linux (RHEL) 9.4 Expands deployment options, optimizing performance across modern environments. *Applicable for 4.8.7	✓	✓	✓			
Performance flexibility	OpenText Identity Manager containers on Microsoft® Azure® and Amazon Web Services®	✓	✓	✓			
Performance flexibility	IDVault.get and IDVault.globalQuery functions	✓	✓	✓			
Performance flexibility	Performance improvement	✓	✓	✓			
Performance flexibility	Extended support of subscribers and service channel for new drivers	✓	✓	✓	✓		
Performance flexibility	Ability to filter entitlement events of other drivers	✓	✓	✓	✓		

Product features	Feature benefits	24.4 (v4.10)	4.9	4.8	4.7	4.6	4.5
Performance flexibility	OpenText Identity Manager engine enhancements	✓	✓	✓	✓	✓	✓
Simplified administration	Enhanced integration to OpenSSL 3.0.15 with TLS 1.3 support	✓					
Simplified administration	Microsoft Modern Authentication and support for OAuth 2.0 authentication for emails accounts in Office 365®	✓	✓				
Simplified administration	Enhancements in monitoring system and application statistics for userapp using CN = Monitor	✓	✓				
Simplified administration	Access to OpenText Identity Governance	✓	✓	✓			
Simplified administration	Support for new localized languages for identity applications	✓	✓	✓			
Simplified administration	Simplified installation on Windows® platforms	✓	✓	✓			
Simplified administration	Simplified packaging of remote loader installation files	✓	✓	✓			
Simplified administration	Relocating the client settings configuration	✓	✓	✓			
Simplified administration	Support for new actions in OpenText Identity Manager Designer	✓	✓	✓			
Simplified administration	Using Git™ for package version control	✓	✓	✓			
Simplified administration	Simplified packaging of installation files	✓	✓	✓	✓		
Simplified administration	Simplified installation on Linux® platforms	✓	✓	✓	✓		
Simplified administration	Changed access to OpenText Identity Manager data collection services	✓	✓	✓	✓		
Simplified administration	Simplified packaging of installation files	✓	✓	✓	✓		
Simplified administration	New dashboard for OpenText Identity Manager	✓	✓	✓	✓	✓	
Simplified administration	Simplified upgrade for identity applications and supporting components	✓	✓	✓	✓	✓	
Simplified administration	Single ISO for OpenText Identity Manager advanced and standard editions	✓	✓	✓	✓	✓	

Product features	Feature benefits	24.4 (v4.10)	4.9	4.8	4.7	4.6	4.5
Simplified administration	Convenience bundling of Identity Manager components	✓	✓	✓	✓	✓	
Simplified administration	Separate installation programs for OpenText One SSO Provider (OSP) and OpenText Self Service Password Reset components	✓	✓	✓	✓	✓	
Simplified administration	Centralized access to the identity applications	✓	✓	✓	✓	✓	✓
Simplified administration	Providing single sign-on access with OpenText One SSO Provider (OSP)	✓	✓	✓	✓	✓	✓
Identity Manager drivers	Enhanced integration module for tools	✓	✓	✓			
Identity Manager drivers	Enhanced integration module for WorkDay	✓	✓	✓			
Identity Manager drivers	Enhanced integration module for Microsoft Enterprise	✓	✓	✓			
Identity Manager drivers	Enhanced integration module for SAP Enterprise	✓	✓	✓			
Identity Manager drivers	Enhanced integration module for Epic	✓	✓	✓			
Enhanced entitlement management	Simplified permission reconciliation services	✓	✓	✓	✓		
Enhanced entitlement management	Catalog administrator for managing roles and resources	✓	✓	✓	✓	✓	✓
Enhanced entitlement management	Permission Collection and Reconciliation Service (PCRS)	✓	✓	✓	✓	✓	✓
