OpenText Open Enterprise Server version comparison chart

The OpenText[™] Open Enterprise Server (OES) solution securely delivers file, print, network, and storage management services. It combines the power of Linux for enterprise workloads with workgroup specialization to save money and enhance productivity.

Product feature	Feature benefits	24.4	2018.3	2015.1
Infrastructure and security	OES extends SUSE® Linux with best-in-class file, print, and identity services			
Powered by		SUSE® Linux Enterprise Server® (SLES) 15 SP4	SLES 12 SP5	SLES 11 SP4
Multi-factor authentication	Protect access to CIFS and NCP shares using advanced authentication	\oslash		
Simplified certificate management	Tools required to stay informed, receive notifications, and replace certificates.	\oslash		
Simplified OES installation and patching	Hassle-free installations with included SLES OS in OES media. Register with single key and get updates for both OES and SLES OS. What's more, OS updates are verified for OES compatibility before you receive and install updates.	\bigotimes	\bigcirc	
TLS 1.3 support	Protect all data transfers with the latest security	\bigotimes		
Secure boot	Protect OES servers from malware attacks	\oslash	\oslash	
AES 256-bit tree key	Protect passwords and other sensitive data stored in eDirectory with AES 256-bit encryption	\oslash	\bigcirc	
Reduce threat exposure with powerful and adoptable SIEM analytics using OpenText Core Behavioral Signals (ArcSight)	CEF logging support in OES enable integration with any SIEM solution for event management and threat modeling	\bigotimes	\bigcirc	

Product feature	Feature benefits	24.4	2018.3	2015.1
Administration	Administrative tools available for managing OES			
Unified management console	Secure, responsive, and reliable remote administration tool for managing OES services	\oslash		
Install and maintain Identity Console using OES media and channels.	Identity Console is a state-of-the-art web- based remote administration console for managing edirectory.	\oslash		
Virtualization	Deploy OES in a virtualized environment			
Deploy OES on Proxmox or Nutanix® hypervisor	0	\oslash		
Clustering on VMware® with vSAN or VMDK storage		\oslash	\bigcirc	
Clustering on VMware with RDM storage				\oslash
Files (NSS)	Distributed, secure, and reliable file system that offers best-in-class rights management			
NSS64 migration	Tools required to automate migration of files to NSS64 with near zero downtime	\oslash		
Global DFS	Access files on any SMB storage (e.g. Windows® server) through NSS	\oslash		
Cache-enabled Pools	Enhance performance of your NSS volumes by attaching fast disk for IO caching	\oslash		
NSS AD	Access to NSS for Microsoft® Active Directory® and Entra ID® (hybrid) users	\oslash	\oslash	\oslash
AES encryption	Protect files on NSS with AES 256 encryption	\oslash	\oslash	
Thin provisioning	On-demand storage allocation based on usage	\oslash	\bigcirc	
4Kn support	NSS optimized for 4K native storage hardware	\bigotimes	\bigcirc	
Cloud integrated storage	Extend your on-premises NSS volumes to any public/private S3 compatible cloud storage	\oslash	\oslash	
File access rights management tool for Windows and Mac®	Manage rights and quota for users on eDirectory and Active Directory with single tool	\oslash	\bigcirc	

Product feature	Feature benefits	24.4	2018.3	2015.1
Protocols	Access OES from any Windows, Mac, or Linux desktops			
Faster CIFS (SMB2)	Twice the performance with large MTU support and optimized system calls	\oslash		
SMB2/3 specification compliance	SMB2/3 specification compliance ensures security and stability by providing pre-auth integrity and encryption, while performance gains through compression and multi-channel support enhance remote user experiences.	\bigcirc		
Multi-factor authentication with NCP	Protect access to NCP shares with advanced authentication	\oslash	\oslash	
SMB2	Major revision to the SMB protocol with enhanced security, stability, and reliability	\oslash	\bigcirc	
Print (iPrint)	Secure, reliable, and scalable solution for managing all your printing across multiple locations from any desktop or mobile device.			
Printer driver and profile management tool	Manage your printer drivers and profile using a standalone tool on Windows	\bigcirc		
New appliance	Built on SLES 15 SP4 for added stability and supportability	\oslash		
Entra ID integration	Entra ID users can authenticate and print to any secure iPrint printers	\oslash	\bigcirc	
Remote renderer	Print with high fidelity using external renderers	\oslash	\bigcirc	
WalkUp printing	Release print jobs to any printer using card or web portal	\oslash	\bigotimes	
Apple [®] AirPrint [®] support	Print from any Mac or iOS® devices without installing additional software to all AirPrint certified printers	(Appliance only)	(Appliance only)	
Domain Services for Windows (DSfW)	Active Directory emulation for increased interoperability.			
Interoperability	Support NAS Synology [®] 7.x and NetApp [®] ONTAP 9.12.x	\oslash		
OpenText Filr integration	Access to OpenText Filr for DSfW users	\oslash	\bigotimes	
Multi-factor authentication	Protect workstation logins with advanced authentication	\oslash	\bigotimes
