Hybrid backup made for small businesses

E3: Enhanced data protection delivered as an appliance

Benefits

- Complete solution including hardware, software and cloud backup
- Hardware is provided as part of the service—no need for upfront purchases
- World-class business support available 24/7
- Comprehensive platform support
- Centralized management and reporting
- End-to-end security
- Scales with your business from .5TB up to 2TB without the need to swap the hardware

Core features

- Broad platform support
- Image backup with dissimilar hardware restore
- Granular restore capabilities for popular applications
- Advanced compression and deduplication to minimize network traffic
- Forever incremental backups
- Centralized management

E3 data protection appliance is a combined hardware and cloud service that lets you protect critical data both on site for rapid recovery and in the cloud for disaster scenarios. We provide and maintain the on-site appliance and we store an entire year of backups in the cloud, giving you a wide range of recovery points to choose from.

Key use cases

- ROBO and branches (Remote office/Back office)
- Plug and play with HW appliance - no dedicated teams needed
- Scalability and flexibility—grows as your data grows without upfront investments

How it works

Backing up and protecting your business-critical data has never been easier. Simply plug in the device, connect to the network and our user-friendly software will begin its configuration. Data is then stored on the E3 appliance on site and replicates the backups to the cloud.

E3 data protection appliance

End-to-end security

Like our OpenText™ Server Backup solution, E3 data protection leverages the latest security protocols like AES 256-bit encryption, TLS, private key encryption, and world-class data centers to keep your data private and secure.

Comprehensive platform support

E3 protects a wide range of platforms and applications, making it easy to manage heterogeneous environments.

We provide a comprehensive range of protection for:

- Windows
- Linux (CentOS, RedHat and SuSE)
- VMware and Hyper-V
- Microsoft SQL
- Microsoft SharePoint
- Microsoft Exchange
- Oracle

Easy to manage from anywhere

E3 data protection comes with retention preconfigured, so you don't have to create your own backup and retention policies. A user-friendly, web-based portal allows you to monitor all backups, including remote sites and virtual environments. It also allows you to create custom reports from a single screen.

Straightforward and affordable

This appliance is a delivered "as-a-service," so the price of the hardware is included in the subscription along with cloud storage and access to software updates. This makes backup a far more compelling proposition for businesses. Pricing is based on protected footprint (the total amount of data you wish to protect) and includes a year of version history.

Accelerated backups and restores

Advanced features like bandwidth throttling and forever incremental backups shorten backup windows while providing faster recovery times. These features allow businesses to reduce the amount of data sent across the network, accelerate recovery, and maximize overall productivity.

Specifications	
Form factor	Desktop
Dimensions	182mm x 36mm x 178mm (7.17 in x 1.42 in x 7 in)
Weight	1.31 kg (2.88 lbs)
Memory	16GB
Storage	Class 35 SSD – up to 256GB capacity
	Class 40 SSD – up to 2TB capacity (Usable capacity: 1.5TB)
Operating system	Windows 10 IoT Enterprise LTSC 2021
Hardware warranty	ProSupport: 7×24; Next Business Day Onsite, 39 Month(s)
