

OpenText SMB Cybersecurity portfolio

Achieve cyber resilience with a purpose-built portfolio designed for businesses

“Our clients in financial services and healthcare have strict compliance requirements that will often call for the full suite of Webroot and Carbonite solutions.”

Dan Meyers
CEO, Computer Business Solutions

As cyberthreats evolve, companies must adopt a layered security approach to counter increasingly sophisticated cyberattacks. Social engineering and phishing attacks affect organizations of all sizes. Mitigating these risks requires multiple technologies and extensive employee training, often involving various vendors, which can be complicated and frustrating. However, companies can simplify this process and strengthen their defenses against evolving threats by using a unified approach from OpenText.

OpenText’s Cybersecurity portfolio

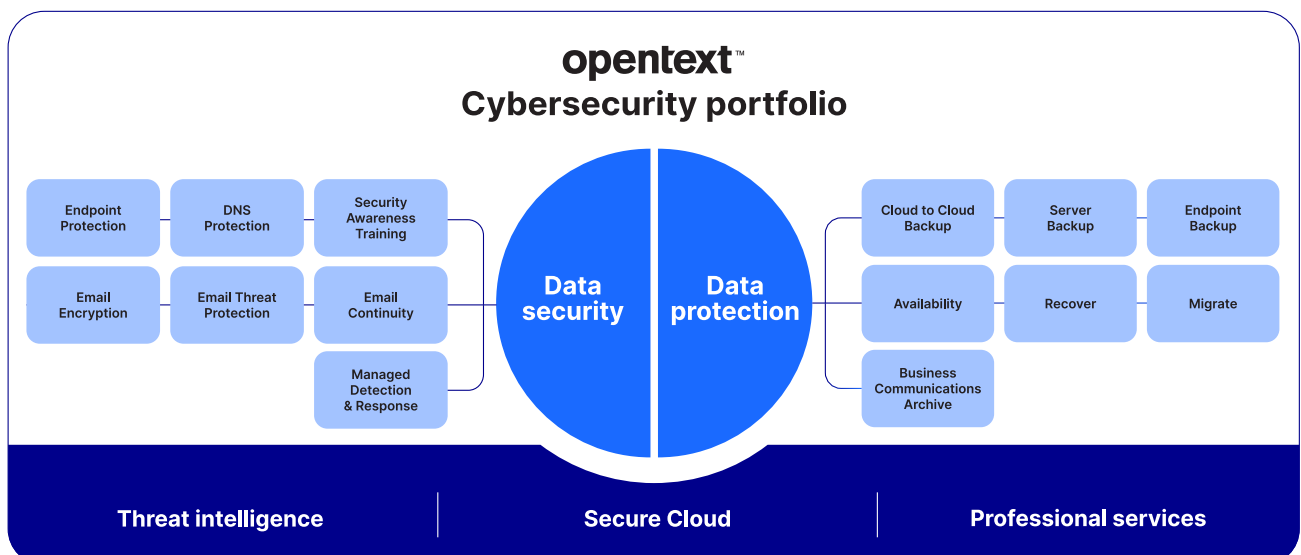

The OpenText™ Cybersecurity Portfolio is more than a cybersecurity suite; it’s a tailored solution for SMBs and businesses. Committed to simplicity, ease of use, and providing maximum value, our platform seamlessly blends cutting-edge technology with user-friendly interfaces. Through industry-leading threat intelligence, automation, and a diverse product set, we revolutionize IT operations, empowering organizations to proactively secure assets. Think of it as a strategic investment in the future resilience and growth of your business.

Products

Data security

OpenText™ Core Email Threat Protection provides multi-layered filtering for inbound, outbound, and internal messages that permits legitimate email while automatically blocking malicious threats such as phishing, ransomware, impersonation, BEC, and spam-type messages.

OpenText™ Core Email Encryption simplifies data security by automatically encrypting emails and attachments containing sensitive information.

It enhances threat defense by encrypting or quarantining messages based on your defined policies, compatible with any email environment.

OpenText™ Core Email Continuity provides users access up to 30 days of company email across all devices even if infrastructure is down and integrates directly into Outlook (POP or IMAP).

OpenText™ Core Endpoint Protection offers next-gen, multi-vector security against malware, ransomware, phishing, and more, with real-time threat intelligence and automated remediation

OpenText™ Core DNS Protection is a DNS filtering solution that leverages the power of Threat Intelligence to enhance security and prevent access to malicious and inappropriate domains.

OpenText™ Core Security Awareness Training is a comprehensive platform that delivers continuous education and realistic phishing simulations to reduce risky user behaviors.

OpenText™ MDR delivers 24/7/365 threat hunting, monitoring and response capabilities from highly trained cybersecurity experts. It combines network visualization, traffic analysis, insider threat monitoring and endpoint security to offer the fastest time in the industry from threat detection to response in 9 minutes.

Data protection

OpenText™ Server Backup offers comprehensive, reliable and proven server protection and support for over 200 operating systems, platforms and applications including physical, virtual and legacy systems. Deployed onsite, it stores copies locally as well as in the secure Carbonite cloud.

OpenText™ Core Endpoint Backup is a comprehensive, automatic backup solution for all your endpoint devices and the data that resides on them. Endpoint Backup simplifies the administrative tasks associated with deploying protection across an entire organization, no matter the size, distribution or sophistication of the environment.

OpenText™ Core Cloud-to-Cloud Backup offers comprehensive backup and recovery of SaaS applications and boasts central management, granular restore, rapid recovery and flexible retention options. Our purpose-built backup solution ensures IT administrators can recover as much or as little SaaS application data as necessary.

OpenText™ Availability ensures the highest availability of Windows and Linux servers, preventing downtime and data loss. It supports physical, virtual, or cloud systems, making it a comprehensive high availability option for organizations with mixed IT environments.

OpenText™ Recover reduces unexpected downtime risk by securely replicating critical systems to the cloud, ensuring an up-to-date copy is available when needed.

OpenText™ Migrate leverages real-time byte-level replication to quickly and easily migrate physical, virtual and cloud workloads over any distance with minimal risk and near-zero downtime.

OpenText™ Core Business Communication Archive provides an easy-to-use, secure and unified information archive and eDiscovery service that simplifies management of historical email and electronic communication data.

More value from OpenText

Industry-leading threat intelligence protection

Our sixth-generation machine learning-based threat intelligence platform is used by over 140 leading security vendors worldwide. It provides accurate insights, identifying known and emerging threats. Our products are shielded from malicious content with near real-time threat intelligence from over 95 million endpoints, updated every 5 minutes.

OpenText Secure Cloud

OpenText Secure Cloud is a powerhouse platform for SMBs and MSPs, offering security, productivity, compliance, and growth from one interface. Secure your environment, stay compliant, and grow your business effortlessly. Accelerate innovation, manage risk, and drive growth with OpenText Secure Cloud.

Microsoft cloud solution

As a Microsoft partner for over 20 years and the original Indirect Provider (CSP Program), we've won the Microsoft US 2022 Operational Excellence Partner of the Year award. With thousands of indirect resellers and over 70,000 joint customers, we offer in-house support for Microsoft 365, resolving about 97% of M365 tickets with our own teams.

Achieve cyber resilience with OpenText

In today's digital landscape, robust cyber resilience is essential. OpenText Cybersecurity provides a comprehensive suite of solutions, powered by industry-leading threat intelligence, to protect against a wide array of cyber threats. Our integrated approach simplifies cybersecurity management, ensuring your business remains secure and compliant. Let OpenText Cybersecurity handle your security needs, so you can concentrate on driving your business forward.
