Your present and future

From current success...

You made the right call. You chose OpenText Application Quality Management as your quality and test management tool. With it, you've:

- Optimized testing efforts through shared assets and reuse.

- Standardized testing processes, so your testing efforts are efficient and aligned.

- Gained real-time visibility into the progress and status of quality, enabling data-based decisions and continuous improvement.

- Significantly reduced defects before releasing into production

- Achieved regulatory compliance with comprehensive traceability and detailed records.

... to future opportunities

But you also know that software quality practices are evolving. Digital transformation and cloud adoption are accelerating, and all industries are embracing Agile or DevOps approaches. Organizations have started using value stream management to improve flow of value in the DevOps pipeline.

Now is the time to plan your future ALM path so you can support your organization's transformation journey. Flexible pricing, new features, Agile and DevOps tools, or Value Stream Management Platform— whatever you need, we've got an ALM option that will work for you.
