

# OpenText™ Core Cloud-to-Cloud Backup for all of your business-critical data

Your guide to our comprehensive and secure backup solution

## Protect all of your Microsoft 365 data with OpenText™ Core Cloud-to-Cloud Backup

Secure your organization from the damaging impact of data loss while ensuring regulatory compliance and improving your workforce's productivity in the cloud.

## Experience the tangible benefits

**Improve productivity** with fast recovery for reduced downtime costs and seamless business continuity

- One-click point-in-time recovery with historical snapshots
- Auto-archive and auto-backup

**Secure Microsoft 365 data** with unlimited AWS S3 backup and recovery from any point in time

- Unlimited point-in-time granular and cross-user recovery with a few clicks
- Encrypted backups for easy data recovery from malware, ransomware and accidental errors and deletion

**Ensure compliance** with GDPR, HIPAA, FINRA and CCPA with secure and encrypted backup

- Secure authentication with MFA/2FA, OAuth and Okta support
- Comply with regulations by selecting data centers in the UK, US, Canada, EU and Australia

## Importance of Cloud-to-Cloud Backup

Cloud services were fast becoming the de-facto way to store data before 2020. Now, the world has moved to remote and hybrid work and every business is reliant on SaaS. This shift online coincides with increased threats. Nearly half of businesses (46%) report having security breaches or attacks in the last 12 months, according to a recent UK government report.

A recent report from Deloitte finds that COVID-19 has led to a spike in phishing, malspams and ransomware as attackers impersonate brands, employees and customers. You can't know what's coming.

## Resources

Backup and recovery are a central part of any business continuity or disaster recovery plan.

## But with OpenText™ Core Cloud-to-Cloud Backup, you can be prepared

Microsoft, Google and Salesforce all recommend third-party backup solutions to protect user data Cloud-to-Cloud Backup.

**“Point in time restoration of mailbox items is out of the scope of the Exchange service.”**

**“We recommend that you use a partner backup solution that can be found on the AppExchange.”**

**“An administrator can restore a user’s Drive or Gmail data for up to 25 days after the data is removed from the user’s trash . . . after 25 days, the data cannot be restored, even if you contact technical support.”**
