

OpenText Aviator

Use case scenarios: Legal

Legal made simple

Why it's hard today

- Slow, manual review of massive data sets
- High costs from outside counsel reviews
- Hard to ensure defensible, compliant processes
- Risk of missing privileged or sensitive content
- Inefficient collaboration across teams

Powered by OpenText

- OpenText™ eDiscovery Aviator™
- OpenText™ Content Aviator™

Wins for everyone

- **Attorneys:** Faster, AI-driven eDiscovery reduces review time and legal costs.
- **Legal support teams:** Stronger compliance and defensibility improve trust and reduce regulatory risk.

The big payoffs

- ▶ **Cut review time by up to 80%**
Automates large-scale document classification and summarization, saving weeks of manual review.
- ▶ **Faster, smarter case preparation**
Surfaces key evidence, privileged content, and historical context in minutes, not months.
- ▶ **Ensure compliance and defensibility**
AI-guided workflows maintain audit-ready processes that stand up in court or regulatory review.

Let's get started...

Legal teams / litigation

support: Automate document classification, privilege review, and case prep with AI-driven search and summaries.

Compliance and risk

management: Identify regulatory gaps and risky content early to avoid penalties.

IT and information governance:

Ensure secure handling and defensible preservation of enterprise content.

Finance and operations:

Reduce outside counsel spend and speed dispute resolution, cutting overall costs.

Explore Legal scenarios

Automate first pass review and data categorization

I'm on the legal team, staring down mountains of case files. With AI sorting, summarizing, and scaling reviews, the paper chase is over. Manual grind down, accuracy up, and attorneys free to focus on winning strategy—not page flipping.

Let's go

Summarize massive documents for legal matters

I'm a legal team member using AI to cut through piles of evidence. With AI gathering key docs, pulling highlights, and prioritizing what matters, I slash review time, reduce costs, and boost accuracy—without missing a thing!

Let's go

Uncover case themes across multiple docs in minutes

I'm a legal investigator who needs to cut through thousands of files to surface what matters. With AI, I instantly highlight critical docs, extract case themes, and connect related evidence—fueling faster discovery, lower costs, and sharper case strategy.

Let's go

Automate first pass review and data categorization

I'm a legal team member trying to get my arms around all the case evidence involved.

1 Set the baseline

Action: Memo text is added to OpenText Aviator and is prepared to guide document review team.

Action: Run against initial control set of documents.

Impact: Clear categorization—documents categorized with confidence.

3 Scale to full review

Action: Specify use 5 categories from highly confident responsive to highly confident not responsive and run against full document collection.

Impact: Classification of the document collection into 5 categories.

2 Refine for accuracy

Action: Text of standard review memo added to OpenText Aviator.

Action: Modify / simplify review memo if required and run against same control set until desired recall and precision is reached.

Impact: Higher precision—optimized review process. Greater recall and precision within initial control set.

4 Free up time – activated!

OpenText Aviator eliminates manual first pass review, letting attorneys and teams focus on litigation strategy.

See it in action!

Automate time-consuming manual review with AI-powered discovery.

Unlock the possibilities:

- **Exceed human review quality** –With up to 90% recall.
- **Reduce costs** – By up to 75% versus manual review.
- **Accelerate document review** – Finish up to 80% faster.
- **Increase efficiency** –Automate time-consuming tasks.

Summarize massive documents for legal matters

I'm a legal team member reviewing and extracting details from large docs.

1 Gather the evidence

Action: Provide text transcription from a large audio/video file.

Impact: The massive document is ready for action.

2 Summarize with speed

Action: "Using the text of the document provide a summary of key themes, concepts, and issues."

Impact: Quick summary of key topics are surfaced for faster case relevance checks.

3 Pull highlights fast

Sample Prompt: "Find similar related documents that can be prioritized for review."

Impact: Don't miss a thing – associated documents are surfaced for summarization.

4 Vacation mode: Activated

Focus on high-value content, cut wasted effort - OpenText Aviator predictive search finds important insights just like magic to make the right decisions fast.

See it in action!

Instantly summarize long legal docs with AI-powered discovery.

Unlock the possibilities:

- **Cut review time** – From hours of reading to seconds with AI summaries.
- **Reduce discovery costs** – Ensuring no evidence is missed.
- **Eliminate wasted effort** – On non-responsive documents.
- **Improve accuracy** – With intelligent analysis that reduces errors.

Uncover case themes across multiple docs in minutes

I'm a legal investigator reviewing and identifying the main case issues.

1 Spotlight the must-reads

Action: Highlight the key case documents.

Impact: Critical files like whistleblower letters and emails revealed in a flash.

2 Pull out the big themes

Sample Prompt: "Accessing the text of key case documents such as a whistleblower letter / email — highlight the main case issues."

Impact: Summarized themes with direct citations to evidence are surfaced.

3 Connect the dots

Sample Prompt: "Does the key issues cited appear in any other of the documents for this case file?"

Impact: Related documents uncovered, adding critical context to the case.

4 Supercharge the review

Faster discovery, stronger legal strategy — OpenText Aviator supports predictive search or TAR (Technically Assisted Review), surfacing insights for deeper case analysis to help legal teams win!

See it in action!

Help guide legal teams with AI-powered discovery insights.

Unlock the possibilities:

- **Accelerate case strategy** – AI-powered analysis transforms complex data into actionable insights in hours.
- **Reduce discovery costs** – Cuts the expense and burden of manual search, review, and summarization.
- **Refocus attorney time** – Frees up hours for strategic planning instead of administrative review.
- **Improve client outcomes** – Better insights lead to stronger case results.

 **Limitless**
