Intelligent information matters

Now, more than ever.

We're experiencing the fastest, deepest, most consequential technology disruption in the history of the world.

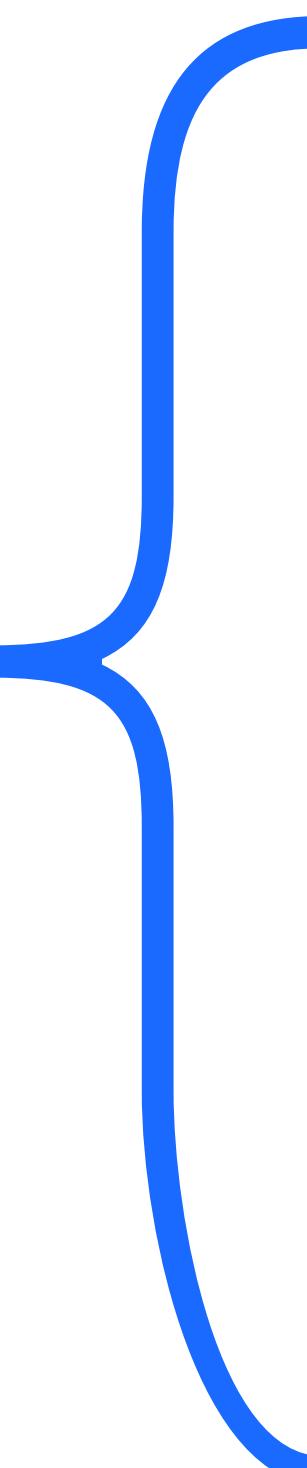

Years of digital transformation planning are now compressed into a few short months of delivery.

As a result, virtually every enterprise is working to overcome large-scale challenges, in these key areas:

Winning the race to recover means rethinking the future, leveraging technology to be stronger, faster, and more resilient.

Together, SAP and OpenText are helping world-leading organizations seize new digital capabilities in the cloud; redefine content, supply chains and customer experience; and re-envision enterprise processes.

We can help you, too.

1	Customer loyalty	
2	Digital work	
3	Supply chain disruption	
4	War for talent	
5	Dynamic processes	
6	Business efficiency	
7	Disruptive technologies	
8	Mergers and acquisitions	

Major challenges. Powerful outcomes.

Results you can count on.

Successful digital transformation requires the world's best partners. For 25+ years, global enterprises have turned to SAP and OpenText to address their biggest challenges. We've helped address these issues, and many more.

"Oil market challenges triggered a company restructuring. Our **agile HR processes** ensured our transformation was successful."

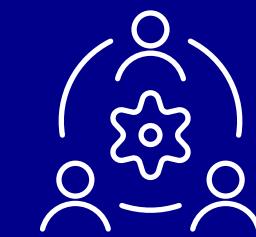

"Our 30-year-old corporate landscape needed a **total digital transformation**—from the ground up."

"To support a new electric vehicle launch, our entire **customer service process** required streamlining."

"Our workforce is aging, and as a new generation takes over, our **innovation strategy** needed to catch up."

"With thousands of remote call center employees, we needed to **rethink onboarding, performance management, and compensation, at scale.**"

"Moving to SAP S4/HANA, we needed to **transform AR and AP processes** to improve cash flow."

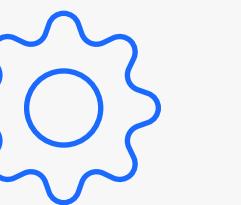

And when organizations put their trust in SAP and OpenText, the results are world-class, too.

What could you achieve with gains like these?

Automating financial processes:

New Zealand retailer Foodstuffs automated the processing of 90% of incoming documents.

90%
Automation

“

There is absolutely no way the team could handle processing if the OpenText solution was not in place. We need the automatic flow rate to stay where it is because we don't even have to look at 90 percent of incoming documents. It's now a business-critical process.”

Simplifying the transition to SAP S/4HANA:

Utilities leader Engie Electrabel migrated 27TB of data to the OpenText cloud in preparation for the move, with no impact on business operations.

“

The solution is meeting our objectives to help us lower and stabilize our operational costs [and] provide access for our customers, improving security, monitoring, and administration.”

**Old World
Industries, LLC**

Improving productivity in payment processes:

Global automotive and chemical leader Old World Industries LLC has improved vendor payment productivity by 33%.

**Improved by
33%**

“

**OpenText definitely provided key tools to
continue being able to pay all of our vendors in
a timely manner.”**

Rethinking supply chain management and strategic sourcing.

Financial corporation FDN realized a 940% gain in process efficiency.

“

The drafting of supplier contracts, with multiple versions, many individuals and departments being involved, numerous reviews and approvals etc., used to take anything up to six months to complete. With OpenText we have now reduced this to typically just five days, a massive efficiency gain.”

How resilience happens

Solutions to help you win the race to recover.
And prepare for whatever's next.

**Your goal: Improve productivity before, during
and after your move to SAP S/4HANA**

**What you can achieve with OpenText Productivity
Solutions for SAP S/4HANA:**

- 1. Streamline your data platform:** Optimize your data footprint, simplify the move, and access documents right in SAP S/4HANA.
- 2. Gain intelligent automation:** Transform key processes such as order-to-cash and procure-to-pay for better cash positions, cost savings, and customer/supplier experiences.

OpenText solutions:

- [OpenText™ Vendor Invoice Management for SAP® Solutions](#)
- [OpenText™ Core Archive for SAP® Solutions](#)
- [OpenText™ Core Capture for SAP® Solutions](#)

Your goal: Collaborate with maximum efficiency in SAP S/4HANA

What you can achieve:

Work from anywhere: Collaborate inside and outside SAP processes with Microsoft 365® integration (including the Office suite and Teams). Control content sprawl with one governed source of truth for all content in SAP and Microsoft 365.

OpenText solutions:

- [OpenText Content Management for Microsoft 365](#)
