

SAP® Certified
Integration with SAP NetWeaver®

OpenText™ Fax2Mail™ is Certified and Integrated with SAP®

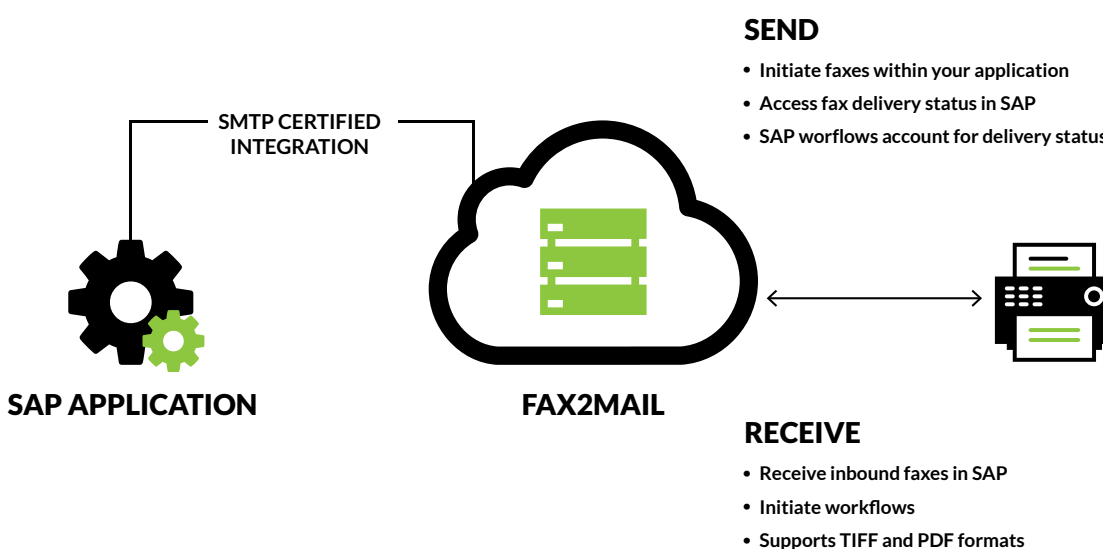

Send and receive faxes through SAP applications
via a certified integration

When the integration of fax processes with SAP applications is critical to your business, OpenText Fax2Mail provides a seamless interface to SAP. Fax2Mail certified integration enables the sending and receiving of faxes without the need for any on-premise hardware or software.

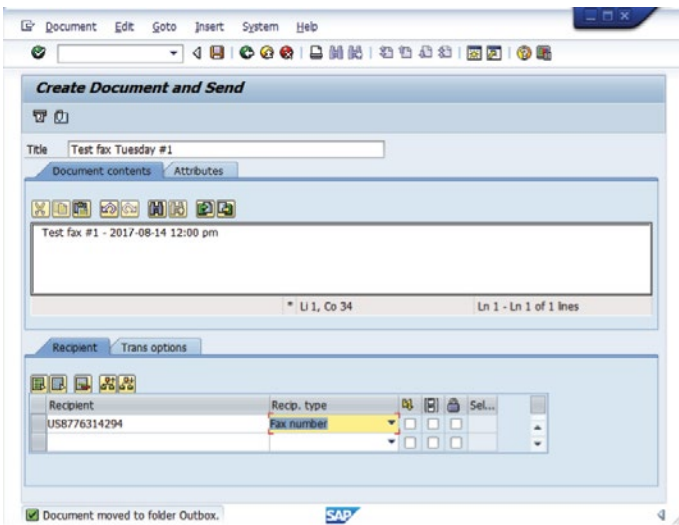

Additionally, fax workflows can be integrated into existing SAP workflows to make end-to-end order-to-cash processes more efficient. The result is easy and cost-effective fax automation through your existing SAP infrastructure. Never send or receive a paper fax again while optimizing your organization's ability to process orders, purchase, pay, and invoice in the cloud.

KEY BENEFITS

- Proven certified integration with SAP®
- Send and receive faxes via SAP easily and cost-effectively
- Integrate production messaging capabilities into SAP workflows
- Experience greater efficiency in order-to-cash processes
- Deploy rapidly
