

OpenText for Legal

An unmatched suite of solutions to tackle a range of legal and compliance needs, purpose-built for modern legal professionals

Securely manage legal content and automate processes

Intelligently search documents and identify experts

Forensically collect evidence from any device, with no business disruption

Defensibly expedite large-scale eDiscovery review and investigations

As enterprises become more intelligent and connected, legal departments and outside counsel face increasing pressure not only to efficiently manage their own processes, but also to effectively advise their businesses and clients on an ever-broadening range of issues—including information management, data privacy, compliance, litigation, forensic investigation and information security.

OpenText is a global leader in legal technology, offering an unmatched breadth and depth of solutions to help legal practitioners tackle eDiscovery and investigations, legal content management, contract analysis and enterprise search. With an industry-leading enterprise information management platform, pioneering analytics and machine learning capabilities and experienced professional services teams, OpenText helps legal customers understand the large volumes of data they collect, generate and oversee, while incorporating the benefits of automation and AI.

“OpenText Axcelerate provides great visualized analytics. Rather than just words on a screen, it presents data the way our attorneys think.”

Dawn Radcliffe
Legal Technology Manager
TransCanada Pipelines, Ltd.

“Our lawyers recognize that having OpenText Axcelerate in-house makes us a more viable candidate for the next case.”

David Stanton
Partner
Pillsbury Winthrop Shaw Pittman LLP

Securely manage legal content and automate processes

Responsible for handling some of the organization's most sensitive information, legal professionals must also leverage that information for key, repeatable processes such as onboarding. OpenText™ eDOCS provides intuitive ways to manage, secure and quickly access work product, whether on-premises or in a private cloud, in a purpose-built system that balances security with access for critical efficiency. OpenText™ Legal Center is a cloud-based project and process management tool that helps automate key processes, such as client onboarding, external sharing and collaboration and document management.

Intelligently search documents and identify experts

Legal professionals know the importance of words and must rapidly retrieve and reference a variety of documents every day. Yet that information must be searchable without exact keywords and often, without even knowing where to look. Identifying internal subject matter experts and sharing tribal knowledge is also crucial for legal teams. OpenText™ Decisiv™ uses AI to surpass mere keywords, applying proprietary unstructured data analytics to search multiple repositories at once to efficiently find documents, projects and internal subject-matter experts.

Forensically collect evidence from any device

On the front lines of litigation and compliance, legal professionals collect key data and potential evidence from corporate devices, such as smart phones, laptops and workstations. That information must be obtained and preserved in a legally defensible manner with judicially-approved tools, so that regulators and opposing parties cannot challenge the data's integrity. OpenText™ EnCase™ is the industry gold standard for evidence collection, enabling forensically-sound, on-site and remote collections—even from endpoints off the network—with no business disruption and total defensibility.

Defensibly expedite large-scale eDiscovery review

Legal professionals must efficiently and accurately review, analyze, redact and produce documents for internal investigations, due diligence and litigation. Quickly searching through massive volumes of data to find relevant documents is expedited and only achievable with machine learning and advanced analytics. OpenText™ Axcelerate™ offers unmatched machine learning and advanced analytics to quickly discover what matters across data for eDiscovery and investigations. Axcelerate delivers award-winning processing, review, analysis, auto-redaction and production trusted by many of the world's leading law firms, corporations and governments.

Eighty-five of the largest 100 companies in the world use OpenText, as do many of the world's premier law firms, regulators and government agencies. With wholly-owned technologies that can be brought to bear to solve specific problems, OpenText offers legal practitioners an extensive array of solutions to meet their needs, including the presence and resources to serve organizations located in virtually any part of the world.

“To collect anything for forensic matters, cybersecurity matters or eDiscovery matters or investigations, it's always going to be OpenText EnCase. You know you're doing it right and you know every court is signed off on it.”

Susan Jackson
Legal Counsel
Novelis

“We rely on OpenText to make sure that our content is safe and secure, first and foremost, and then easily accessible.”

Ivaylo Nikolov
