

# STRONG REMOTE ACCESS BOOSTS POWER USER TEAMS FOR LEADING BUSINESSES

Organizations that are leaders in providing remote access to critical applications embrace powerful remote solutions that not only have full fidelity to the desktop experience, but also come with strong and interactive real-time collaboration. These capabilities boost team agility and increase security and compliance through improved management and monitoring.

**LEADING organizations are:**

<b>2x</b>	more likely to achieve increased security and compliance for remote applications
<b>25%</b>	more likely to deploy remote application access solutions that are focused on power users and high-end applications
<b>50%</b>	more likely to see improved collaboration for users of remote applications
<b>40%</b>	more likely to have increased agility and control over applications
<b>2.5x</b>	more likely to see improved worker productivity
