It’s a digital world

The business world is experiencing a digital transformation due to new technologies, a changing workforce, security and governance, regulatory pressure, and the digital customer.

How to compete in a Digital World

Digital transformation is a journey not a destination. And there are 3 important steps along the way:

1. Take care of the basics
   - Reduce costs, improve efficiencies, and increase competitiveness.
2. Reassess the business model
   - Consolidate information and upgrade process platforms to enable growth.
3. Improve competitiveness
   - Integrate systems, foster innovation, build partnerships, and increase revenue through speedy information delivery.

Digital leaders outperform their peers in every industry. — McKinsey & Company

OpenText looks at things holistically. It isn’t about just one piece of the puzzle. It’s how do the pieces fit together, whether it’s digital, data, or analytics.
