OpenText™ Content Suite Platform, Cloud Edition

ECM as the foundation for business transformation

In the digital world, information is the new currency–and it needs to be maximized to extract more value.

Deploying Enterprise Content Management (ECM) is the first step to achieving this goal. It can transform your business by enabling sharing, collaboration, analysis and decision-making based on the effective management of information, while mitigating risk through governance, compliance and security. But deploying an ECM initiative is not a small undertaking for any enterprise. It can be difficult to meet timelines and balance business needs with hardware and user requirements. Implementation teams can end up with drained budgets and worn out goodwill caused by trying to satisfy too many diverse requirements.

To avoid these issues, more and more companies are choosing to deploy ECM in the cloud. Others are still skeptical about the security of the cloud and worry it won't be flexible enough to allow for customized solutions or integration to their existing and vital enterprise applications.

OpenText Content Suite Platform, Cloud Edition can reduce the cost, time and staff needed to manage your OpenText solution. It includes a secure VPN connection, which allows your users to connect to the internet via a VPN server. This means all data traveling between your computers, phones or tablets and this VPN server is securely encrypted. Content Suite in the Cloud also eliminates investment in infrastructure and frees up your

BENEFITS

- *Improves overall performance for remote users*
- *Decreases time to upgrade and deploy new features for end users*
- *Enables organizational elasticity for faster turnaround and business agility*
- *Increases security, compliance and governance with ready-made infrastructure*
- *Reduces operational and infrastructure costs*
- *Enables IT to shift its focus to innovation*

opentext™

expert IT staff. Content Suite Platform, Cloud Edition is built to be as flexible and configurable as your on-premises applications.

Accelerate your time to go-live with the right products and cloud services

With Content Suite Platform, Cloud Edition, organizations can accelerate their cloud implementations and, consequently, their business. The set-up and configuration process is easier than with traditional deployments and your organization is always using the most current product versions: OpenText is responsible for the development, testing and upgrading of the software.

Cloud delivery takes the complexity out of your purchasing decision. OpenText provides all the hardware, software and system administration expertise needed to manage a new solution, allowing you and your employees to focus on your core business. This is a significantly more valuable way to spend your time.

Augment Content Suite Platform, Cloud Edition with complementary functional add-ons

The OpenText™ Brava!™ Add-on provides unlimited document viewing capabilities to all users with the benefits of security, role-based redactions and mobility.

The OpenText™ Content Intelligence Add-on allows organizations to build custom applications, views, actionable dashboards, reports, workflow/process interactions and intuitive methods for knowledge workers to interact with their content.

The Microsoft® Office Online Add-on enables improved personal productivity with the web editing and co-authoring of OpenText™ Content Server documents in a hybrid cloud deployment, where the OpenText Cloud hosts the key integration application and secured data transfer between Microsoft® Office 365® and Content Suite.

OpenText Content Suite Platform, Cloud Edition combines cloud operational efficiencies with on-premises flexibility and configurability

Built by our ECM experts, managed in the OpenText Cloud

Content Suite Platform, Cloud Edition combines cloud operational efficiencies with on-premises flexibility and configurability. OpenText's ECM experts create a centralized repository of organized business content that is managed in the cloud and accessible from anywhere at any time. Unlike commercial cloud platforms, the OpenText Cloud is powered by a backbone of expertise in B2B commerce, compliance and information management. The OpenText Cloud provides one stop for all your Enterprise Information Management needs, from product, support, application management and Professional Services. It grows with your needs with flexible options to support the right deployment model, from departmental to mission-critical enterprise applications. It provides enterprise-class infrastructure promoting security, compliance and governance.
