

Put the cloud to work for you—your way

Soar to new heights with cloud content services

You can go your own way

Modernizing how you manage content is a critical part of digital transformation. But you don't have to move to the cloud all at once. Instead, you can take a hybrid approach, using SaaS applications to augment your existing content services solution.

57%

of content is still stored on premises.

64%

of organizations storing all content on prem say they're at a competitive disadvantage.

51%

of organizations are struggling to keep up with customer expectations for self-service information.

76%

of organizations believe improving their content management and collaboration would accelerate their business.

With hybrid cloud options, you can move content and collaboration to the cloud at your own pace—so you can maintain full control as you leverage the agility of the cloud.

"For companies looking to drive innovation, adopting cloud platforms and integration tools is a big step in the right direction."

- Forrester Consulting Study

Let's get you here

The sooner you start taking advantage of what the cloud can offer, the more agile, innovative and resilient your business will be. With the flexible, enterprise-grade capabilities of OpenText content services, you can leverage the cloud in your own way, at your own pace.

5 reasons to get on board

1

Empower your people

Watch productivity skyrocket. With simple experiences on all devices, seamless editing and syncing, easy sharing and more, users can make the most of every minute.

46%

of organizations using cloud services experienced higher productivity.

2

Free up your teams

With a single source of truth, teams know they're always collaborating on the latest version. Uploading, sharing, editing, and finalizing documents all happens inside the platform—not over email.

52%

of respondents cite improved collaboration as a benefit of cloud content platforms.

3

Bring trusted partners in—safely

Streamline sharing from your content services platform with collaborators outside your firewall, without compromising security. And with a secure digital signature solution, you'll save precious time finalizing every agreement.

"Organizations want tools that are fast, easy to use, and make external collaboration easy."

4

Tick all the security boxes

Content collaboration in the cloud doesn't have to mean giving up control. With advanced security features and enhanced admin controls, you'll be able to meet all your IT and compliance requirements.

68%

of organizations adopting hybrid-cloud content management solutions experience improved security.

5

Do more for your customers

Leveraging secure, cloud technology that integrates with your existing on-prem platform, you'll be able to innovate faster, improve customer satisfaction, and adjust to market pressures on the fly.

72%

of organizations have experienced improved customer satisfaction by taking a cloud-based approach.
