

DATA SHEET

OpenText Forensics Academic Program – Encouraging Excellence in Digital Forensics

Putting together a digital forensics curriculum can be timely and expensive. Knowledge of the latest and greatest tools, tactics and strategies associated with forensic investigations, and practical real-world experience, is needed to effectively train, educate and graduate tomorrow's digital examiners and investigators.

Saves valuable academic resources

Develops the skills required to become a forensic investigator

Provides access to market-leading forensic investigation tools

Builds familiarity with industry workflows

A digital forensics degree can help aspiring computer forensics professionals gain the skills and knowledge needed to pursue employment in this rapidly changing and competitive field. According to the Bureau of Labor Statistics, employment growth for forensic science professionals will be much faster than average over the next decade.

The OpenText Forensics Academic Program (OFAP) provides qualified educational institutions with the ability to create and deliver digital investigation courses. OFAP is a semester-based program that includes access to market-leading digital investigation solutions and develops the skills required to obtain work as a digital forensic practitioner. Developed by a digital forensics expert with over 20 years of real-world investigative and training experience, and aligned with published digital forensics standard curriculums, the OFAP curriculum helps instructors arm their students with the skill sets needed to manage investigations in today's rapidly changing digital world.

OpenText Forensics Academic Program is offered across three tiers, each with specific benefits and support. Each tier is structured to provide the flexibility to design a course package that fits the class size, faculty expertise and specific needs of each individual educational institution.

| Bronze Level | Silver Level | Gold Level |
|--|--|---|
| EnCase Forensic Software Academic License | EnCase Forensic Software Academic License | EnCase Forensic Software Academic License |
| Option to purchase Tableau Forensic Imager | Option to purchase Tableau Forensic Imager | Option to purchase Tableau Forensic Imager |

| Instructor Support with high-level semester course outline | Instructor Support with detailed semester course outline | Instructor Support with full course content |
| | Free image evidence file for semester project | Free image evidence file for semester project |
| | 1 hr. guest lecture | 2 hr. guest lecture |

At OpenText|Security, our goal is to make the world a safer, more secure place by finding the truth in data. This starts by making sure we help develop the next-generation of forensic investigators and examiners, providing you with the content you need to develop their knowledge of digital forensics concepts, tools and best practices and give them the confidence they need to defend their evidence in court.
