

OpenText™ Content Suite Platform, Cloud Edition

ECM as the foundation for business transformation

Content in the digital world is the new currency, which needs to be, not just managed, but also maximized to extract more value in the context of the business it serves.

Deploying Enterprise Content Management (ECM) is the first step to digital transformation. It has the ability to transform your business by enabling sharing, collaboration, analysis, and decision making, based on the effective management of content to harness its potential, while mitigating risk through governance, compliance, and security.

But deploying an ECM initiative is not a small undertaking for any enterprise. Businesses often struggle to meet their timelines for deployment as they balance their business needs with hardware and user requirements. This leaves implementation teams with drained budgets and worn out goodwill caused by trying to satisfy too many diverse requirements.

For more and more companies, the solution to these problems is deploying ECM in the cloud. But many are still leery that the cloud may not provide the right level of security, won't be flexible enough to allow for customized solutions, or will not allow for integration to their existing and vital enterprise applications.

Deploying an optimized cloud with flexible options to grow your solution

OpenText Content Suite Platform, Cloud Edition offers a simplified, clear cost option for your OpenText solution operation. It can reduce the cost, time, and staff needed to care for and feed your OpenText solution. Content Suite in the Cloud eliminates the need for investment in infrastructure and frees up your expert IT staff. Content Suite Platform, Cloud Edition is built to be as flexible and configurable as what you are used to with your on-premises applications.

BENEFITS

- *Improved overall performance for remote users*
- *Faster time to upgrade and deploy new features for end users*
- *Enable organizational elasticity for faster turnaround and business agility*
- *Consume the services you need when you need them*
- *Increase security, compliance, and governance with ready-made infrastructure*
- *Reduce operational and infrastructure costs*
- *Enable IT to shift their focus to innovation*

Accelerate your time to go-live with the right products and the right cloud services

OpenText Content Suite Platform, Cloud Edition allows organizations to accelerate their cloud implementations and, consequently, their business. The set up and configuration process is easier and the organization is always using the most current product versions: OpenText is responsible for development, testing, and upgrade of the software. Cloud delivery takes the complexity out of your purchasing decision. OpenText provides all the hardware, software, and system administration expertise needed to manage a new solution, allowing you and your employees to focus on your core business. This is a significantly more valuable way to spend your time.

Augment your Cloud Edition with complementary functional add-ons

The Brava!™ Add-on, providing unlimited document viewing capabilities to all users—with the benefits of security, role-based redactions, mobility, etc.

The Content Intelligence Add-on, allowing organizations to build custom applications, views, actionable dashboards, reports, workflow/process interactions, and intuitive methods for knowledge workers to interact with their content.

The Microsoft® Office Online Add-on, introducing improved personal productivity with the web editing and co-authoring of OpenText™ Content Server documents in a hybrid cloud deployment where the OpenText Cloud hosts the key integration application and secured data transfer between Microsoft® Office 365® and Content Suite.

Built by our ECM experts, managed in the OpenText Cloud

Content Suite Platform, Cloud Edition combines cloud operational efficiencies with on-premises flexibility and configurability. Our ECM experts create a centralized repository of organized business content that is managed in the cloud and accessible from anywhere at any time. Unlike commercial cloud platforms, the OpenText Cloud is powered by a backbone of expertise in B2B commerce, compliance, and information management. The OpenText Cloud provides one stop for all your Enterprise Information Management needs, from product, support, application management and Professional Services. It grows with your needs with flexible options to support the right deployment model, from departmental to mission critical enterprise applications. It provides enterprise-class infrastructure promoting security, compliance, and governance.
