Product overview

OpenText™ Axcelerate™
End-to-end eDiscovery and investigations platform

The explosion of data volumes and sources, heightened regulatory requirements and cybersecurity risks are driving up the costs and risks of eDiscovery, investigations and regulatory compliance mandates. And while litigation budgets are under scrutiny with demands for cost containment, legal teams are expected to deliver superior results, on time. To achieve efficiencies and cost-savings, while delivering superior results, legal teams are looking to end-to-end solutions with integrated analytics, machine learning, rich visualizations and automation.

OpenText™ Axcelerate™ is a flexible and powerful end-to-end eDiscovery and investigations platform built from the ground up around proprietary advanced analytics, machine learning and automation. Axcelerate delivers best-in-class investigative capabilities in a fully integrated, intuitive review interface that helps get legal teams the facts that matter sooner and inform their case strategy. Axcelerate empowers users to take greater control over the process—from ingesting, collecting data and culling intelligently and automating as many manual tasks as possible, to reviewing only what is necessary.

Simplify eDiscovery with end-to-end functionality in a single platform

Increase efficiency and cost-savings with powerful built-in analytics and technology-assisted review

Substantially reduce risks

Deploy with flexibility

Simplify eDiscovery with end-to-end functionality in a single platform

Axcelerate streamlines and simplifies eDiscovery and investigations, integrating data exploration and identification, collection, processing, analysis and review and production in a single platform, delivered by a single vendor. Axcelerate offers front-end analytics through OpenText™ Axcelerate™ Investigation for true early case analysis and data investigation at the earliest stages of a matter, enabling rapid data insight and faster case strategy and decisions.
Integrated analytics and review capabilities are designed for a streamlined process that quickly surfaces relevant content.

**Increase efficiency and cost-savings with powerful built-in analytics and technology-assisted review**

Built-in data analytics and technology-assisted review capabilities provide legal teams with early and important insight to quickly understand and intelligently organize the data to improve review efficiency and cost savings by minimizing the overall volume of documents warranting legal review. Analytics and machine learning features include:

- Technology-assisted review based on machine learning prioritizes the relevant documents for review.
- Predictive filters reveal from human review decisions to predict the search terms and parameters that are most likely to uncover valuable insights, such as which content stores are likely to contain relevant information; Predictive searching surfaces conceptually similar documents on-the-fly without requiring a full TAR workflow;
- Advanced phrase and concept analysis intelligently organizes documents to further speed review;
- Stackable Smart Filters leverage a wide range of metadata to efficiently narrow in on relevant content;
- Sentiment analysis and automated identification and extraction of people, places and organizations provide insight into commonalities and patterns amongst the documents;
- Hypergraph Communications Map provides an intuitive way to see who is communicating with whom;
- Rich visualizations reveal what Axcelerate’s analytics have uncovered so reviewers can see the big picture view
- Sentiment and phrase analysis provide additional insight into the meaning and intent of communications and content; and,
- Automated document summaries provide users with quick understanding of the document’s content.

**Substantially reduce risks**

Integrated capabilities and standardized processes minimize the risk of missing critical information or inadvertently disclosing privileged, sensitive or private information. Features include:

- Automated data detection finds for PII, PCI and PHI;
- Automated entity extraction locates people’s names unrelated to a data privacy rights request;
- Bulk redaction capabilities streamline the process and ensures that redactions are applied consistently across the dataset; and,
- Self-triggered quality assurance checks help assure risk-free production.

---

**OpenText Professional Services**

OpenText Professional Services provides flexible support and training to ensure optimal use of Axcelerate. If deployed on premise, the team can help with architecture design and technical implementation including hardware installation, SSO integration, configuration and validation. The team also will provide project management, data processing and other data management services.

**Training and certification**

Axcelerate Data Processing Specialist Certification »
Axcelerate Review and Analysis – Investigator »
Deploy with flexibility

Axcelerate provides the flexibility enterprises seek when it comes to managing and securing sensitive data, offering various deployment options:

- On-premises server-based solution: Axcelerate can be deployed completely on-premise with data ingestion, processing, ECA, review and production capabilities all behind the corporate firewall, with high scalability for data volumes, active matters and number of users.

- Cloud-based on-demand model for single matters or as a subscription model: Axcelerate provides enterprises with a fully inclusive, subscription-based access to Axcelerate’s powerful analytics, machine learning and review capabilities in an ultra-secure cloud infrastructure with flexible service options.

- Hybrid approach: Axcelerate can also be deployed as a hybrid solution with Axcelerate ECA installed on-premise and Axcelerate analytics and review capabilities running in the cloud. With one click, data can be transferred from the on-premise environment to the cloud for review.

- Air-gapped temporary portable solution: Axcelerate Portable Solution is an appliance-based full instance of Axcelerate for temporary, on-site projects (e.g., to protect against cyber threats and comply with data privacy and country- or location-specific data privacy requirements).

- Forensic collections
- Axcelerate Portable Solution
- High-efficiency managed document review
- Multi-language translation and review
- Technology-assisted review consulting
- Legacy data management
- Project management
- OpenText™ Managed Services

"After a thorough competitive review, we chose OpenText Axcelerate. We were impressed with its predictive coding technology and foreign language support."

Siemens Corporation

"No other platform matches OpenText Axcelerate’s combination of power and usability for high-stakes review."

Bennett Borden
Drinker Biddle & Reath LLP

"OpenText Axcelerate changes the way that we investigate. It has become a much more intuitive and iterative process. We’re embedding that in the culture of our investigations now."

Richard Day

### OpenText Axcelerate features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Negative proximity operator</strong></td>
<td>Reduce false hits by ignoring keyword matches when the second term is used extraneously (e.g., in email signature lines). Only returns term 1 keywords if they are a specified number of words away from term 2 keywords.</td>
</tr>
<tr>
<td><strong>Concept analysis</strong></td>
<td>Group documents based on the contextual meaning of associated common phrases, allowing reviewers to gain context beyond keywords and code names.</td>
</tr>
<tr>
<td><strong>Sentiment analysis</strong></td>
<td>Gain a faster and deeper understanding of data by categorizing documents by whether they contain positive, negative or neutral sentiments.</td>
</tr>
<tr>
<td><strong>Entity identification</strong></td>
<td>Achieve additional layers of insight for communications analysis and investigations. Axcelerate Smart Filters include integrated detection tools that automatically surface the names of people, places and organizations.</td>
</tr>
<tr>
<td><strong>Multilingual analytics</strong></td>
<td>Enrich unstructured data with powerful analytics on a language-agnostic basis, including pictorial languages like Chinese, Japanese and Korean.</td>
</tr>
<tr>
<td><strong>Production wizard</strong></td>
<td>Select from pre-configured options for how the discovery set is presented.</td>
</tr>
<tr>
<td><strong>BI dashboards</strong></td>
<td>Monitor and share review progress with interactive dashboards, track project data down to the individual coding decisions or see aggregated trends across entire case portfolios. Get critical insights for caseload management and budget.</td>
</tr>
