

SOLUTION OVERVIEW

OpenText Accelerate Portable Solution

Full-featured eDiscovery and investigations solution for compliance with data isolation and privacy laws

Deploys pre-installed for quarantined eDiscovery projects or investigations

Offers end-to-end eDiscovery and investigation capabilities

Provides supporting services

Market forces are converging that necessitate another approach to deploying and managing eDiscovery technology for litigation or investigations. These include data privacy and isolation laws prohibiting cross-border data traffic; the need for organizations with hybrid systems to conduct complete reviews and remove sensitive information from documents prior to production or transfer to the cloud; and the rapid rise of cybersecurity threats from outside the organization.

OpenText Accelerate Portable Solution addresses the growing need for secure eDiscovery and investigation projects in which data needs to stay on premises or in jurisdiction to comply with data privacy laws. A temporary, completely air-gapped eDiscovery solution, Accelerate Portable Solution ensures maximum security by isolating the computer or network and preventing it from establishing an external connection—eliminating access by external parties, including potential infiltrators. Similarly, Accelerate Portable Solution assists companies with hybrid data strategies, where some content is held on premises and other data is hosted in the cloud. This enables legal teams to conduct a parallel review based on need.

Deploys pre-installed for quarantined eDiscovery projects or investigations

The complete OpenText™ Accelerate™ solution is pre-installed on a portable server and delivered in a travel kit to the organization's location—virtually anywhere in the world. The OpenText eDiscovery services team prepares the portable unit prior to delivery, then goes on site to process data and ensure the project team is ready to hit the ground running.

“We are delighted to work with OpenText as a trusted partner to deliver this solution.”

Eversheds Sutherland

“The data science team at OpenText has done an excellent job in helping us communicate how the technology works to our clients and attorneys in the firm.”

David Stanton
Pillsbury

“OpenText™ Axcelerate™ provides great visualized analytics. Rather than just words on a screen, it presents data the way our attorneys think.”

Dawn Radcliffe
Legal Technology Manager
TransCanada Pipelines, Ltd.

On-premises reviewer PCs can be connected to the portable kit for the duration of the project. Once the project has concluded, the server is securely and forensically wiped and returned to OpenText.

Offers end-to-end eDiscovery and investigation capabilities

Axcelerate Portable Solution is a fully featured instance of the on-premises server, packaged to be deployed for temporary standalone projects. Key features include:

- Early case assessment tools for culling data sets and surfacing the content for analysis and review.
- Auto-redaction tools to detect and cleanse sensitive content including personal data.
- Patented advanced analytics, visualizations, predictive filters and additional analytics for legal teams to carry out faster, more efficient document reviews or investigations—all fully integrated into Axcelerate.
- Technology-assisted review based on continuous learning to further accelerate review by prioritizing the most relevant documents.
- Production workflows with configurable rules and a production wizard to speed discovery set production.

Provides supporting services

Configuration of the portable unit and on-site implementation is always included in an Axcelerate Portable Solution project. OpenText can provide additional services as needed to help legal teams accelerate the effort, including:

- Forensic collections.
- Data ingestion and processing.
- Review workflow consulting to optimize continuous machine learning and expedite review.
- Managed review leveraging technology-assisted review.
- Production services.
- Managed services to manage and support a project end-to-end.
