

OpenText™ Enterprise Information Management (EIM) Solutions on Microsoft® Azure

Collaboratively providing real business solutions for corporate customers

Many enterprises are moving to the cloud in order to reduce costs, improve speed to market and increase flexibility in changing their IT resources to quickly satisfy new market needs. For some enterprises, this move will involve a hybrid landscape of on-premises, private cloud and public cloud operations.

OpenText Solutions Currently Supported on Microsoft Azure

In order to support our customers who wish to move to the Microsoft cloud using the Microsoft Azure platform, OpenText offers selected solutions that are supported on Azure. This includes applications such as the following:

- Content Suite Platform (OpenText™ Content Server 10.5 SP1, OpenText™ Archive Server 10.5 SP1 and OpenText™ Directory Services 10.5 SP1)
- SharePoint Solutions (OpenText™ Application Governance & Archiving for Microsoft® SharePoint® 10.7 SP1, OpenText™ Microsoft® SharePoint® Services for Extended ECM for SAP® Solutions 10.7 SP1)
- Email Solutions (OpenText™ Email Archiving for Microsoft® Exchange 10.5 SP1, OpenText™ Email Management for Microsoft® Exchange 10.5 SP1)
- Extended ECM for SAP Solutions 10.5 SP1
- OpenText™ Media Management 10.5

In addition, the Content Suite is now available on the Microsoft Azure Marketplace. Customers can run the leading Enterprise Information Management (EIM) solutions on Azure with full OpenText product and services support. The support for OpenText EIM solutions running on Azure is provided through the OpenText Optimize Services in service levels of Basic, Bronze, Silver and Gold.

OPENTEXT SOLUTIONS SUPPORTED ON AZURE

- Content Suite Platform

OpenText and Microsoft Working Together

OpenText is a global leader in developing content and process management solutions that span information governance, document capture, records management, archiving, business process management, case management, and more. OpenText and Microsoft have collaborated to provide real business solutions for corporate customers, combining the power of the Microsoft application platform and productivity technologies with the OpenText expertise in, and deep understanding of, EIM. Through their strategic alliance, OpenText and Microsoft are delivering solutions and frameworks that embrace and extend the Microsoft platform, not only for on-premises deployment, but also for deployment on the Azure platform.

The Highest Level of Competence and Expertise

OpenText is a Global Microsoft Alliance Partner with certified personnel in locations around the globe, having demonstrated an exemplary track record when it comes to successful implementations, capabilities, and technical certifications. As a result, OpenText has in-depth access to a variety of exclusive Microsoft resources, including priority access to a support team of Microsoft-certified systems engineers, nondisclosure evaluation of new Microsoft products and technologies, as well as planning tools and events to align our latest product developments and direction. OpenText was named a 2015 Microsoft Partner of the Year Award Finalist for Application Development Competency at the Microsoft 2015 Worldwide Partner Conference.

- Content Suite Platform
- SharePoint Solutions (Application Governance & Archiving for SharePoint, SharePoint Services for Extended ECM)
- Email Solutions (Email Archiving for Exchange and Email Management for Exchange)
- Extended ECM for SAP Solutions
- Media Management

Future OpenText Solutions Supported on Microsoft Azure

OpenText is working with Microsoft to certify the following OpenText solutions on Azure in the near future: Customer Communications Management, Capture Center and Web Site Management. Also, OpenText is working with Microsoft to integrate OpenText Media Management with Azure Media Services, Azure Object Store and SQL Azure.

Why OpenText and Azure

The OpenText EIM platform enables organizations to discover and manage information to spur growth and innovation across their

“Our relationship with Microsoft allows us to support our customers with the flexibility to utilize Microsoft’s cloud platform while still maintaining the power of EIM solutions for which OpenText is known.”

ADAM HOWATSON, CHIEF MARKETING OFFICER, OPENTEXT

organization, increasing time to competitive advantage. Consisting of five comprehensive and integrated product suites, OpenText EIM provides the foundation for a cohesive information management strategy that leverages existing assets, meets urgent needs and establishes a fast path to the future. Available on-premises and in the cloud, OpenText EIM solutions include managed cloud services, subscription pricing, private, public and hybrid-cloud hosting models in local, secure and discrete data zones.

By supporting Azure, OpenText now offers alternatives to those who have virtualized data center workloads on the Microsoft infrastructure cloud. As part of our commitment to customers, OpenText will now provide full customer support and services for customers to run OpenText managed solutions on Azure. OpenText EIM solutions can help enterprises with regulatory compliance, long-term archiving and retention, data sovereignty and other information governance needs. OpenText is also well-positioned due to its strategic alliance with Microsoft to help customers with complex hybrid on-premises and cloud environments.

Why ECM Still Matters With the Microsoft Cloud

- Regulatory compliance
- Long-term archiving and retention
- Controlled content disposal
- Access to enterprise records
- Data sovereignty
- Integration with existing enterprise application landscape

Summary

OpenText and Microsoft work together to make OpenText software available on Microsoft’s cloud platform, enabling mutual customers to combine the benefits of the world’s leading EIM solutions with the elasticity and scale of Microsoft Azure.
