

Tableau Forensic T8u USB Bridge

GETTING STARTED

Confirm that the bridge is off before beginning.

1. Connect one USB source device* to the right side of T8u **1**
** T8u supports USB devices that conform to the USB Mass Storage Bulk-Only specification.*
2. Connect the bridge to the host computer using the host USB port **2**
3. Connect the power supply to the bridge's DC In **3**
4. Press the power button **⏻** and begin operation

Before you remove the connected USB device or power down the T8u, safely eject or unmount the device on your host computer.

LCD MENU OPTIONS

Device Info	Displays the connected USB device mfg, model, serial number and firmware version
Select LUN	If the drive has multiple LUNs, select a LUN to mount
Bridge Info	Displays T8u firmware version, serial number and DIP switch configuration
Show Status	Displays information related to current status

Use the Menu and Enter buttons to navigate through these LCD menus:

- Menu** **⌂** Advance to next main menu screen
- Enter** **↵** Advance to the first/next informational screen

CONNECTION RECOMMENDATIONS

For USB Device	Use cable supplied with USB device or directly connect
For the Host Connection	Use a Tableau USB 3.0 cable (TC-USB3)
For Power (DC In)	Use a Tableau power supply (TP5 or TP2)

DIP SWITCH SETTINGS

SWITCH 1	ON = Read/Write ⚠ OFF = Read-Only
SWITCH 2	ON = Hide Write Protect OFF = Report Write Protect
SWITCH 3	ON = Hide Write Errors OFF = Report Write Errors
SWITCH 4	No Function

* Default setting is OFF for all switches

FIRMWARE UPDATES

Free firmware updates are provided for Tableau Forensic products on a regular basis through the Tableau Firmware Update (TFU) utility. Reference the Tableau Download Center webpage for more information:
