

Addendum to Micro Focus Business Support Agreement

Fortify Software Security Content Service

This addendum ("Addendum") applies to the Fortify Software Security Content Service software products. This Addendum amends and is made part of the Micro Focus Business Support Agreement ("BSA").

The provisions of the Addendum add to or modify the provisions of the BSA for the Fortify Software Security Content Service, as further outlined herein. To the extent that there is any conflict between the provisions of this Addendum and the provisions of the BSA, the provisions of this Addendum shall control.

Introduction

Micro Focus Business Support for Fortify Includes:

The Fortify Software Security Content service, which will help ensure you receive the latest security intelligence for the Fortify products.

Fortify Software Security Content Service

The Fortify Software Security Content service ("Service") may include one or more of the following features as further defined below, based on the software product purchased. The Service is available to current subscribers to Micro Focus Business Support (or Enterprise Support Standard or Basic)¹ at no additional cost.²

- **Fortify Secure Coding Rulepacks:** Fortify Secure Coding Rulepacks means rules content for use by Fortify Static Code

Analyzer to identify vulnerable code patterns across supported programming languages and vulnerability categories.

- **WebInspect SecureBase:** WebInspect SecureBase means rules content for use by WebInspect that includes automated attack patterns for security vulnerabilities with policies that guide users in identifying critical weaknesses in web applications and web services under test.
- **Fortify Runtime Rulepacks:** Fortify Runtime Rulepacks means rules content for use by Fortify Runtime and ArcSight Application View to extract security-related information from running applications and to protect applications against the most common application vulnerabilities.
- **Premium Content:** Premium Content means additional artifacts occasionally produced by Software Security Research for the Fortify product suite, including but not limited to reports and project templates for Fortify Software Security Center, WebInspect testing policies, and specialized rules content designed to address new security challenges.
