OpenText B2B Integration Essentials

Fast, compliant B2B integration and EDI for growing businesses

Benefits

- Fast onboarding and easy, affordable connectivity
- Guaranteed compliance
- Less IT involvement to manage EDI
- Clear supply chain visibility
- Built to grow with you
- Easy-to-use online portal
- Multilingual support
- Online help to guide you as you go

Small and medium-sized businesses (SMBs) are required to accommodate an increasing number of orders and complex digital mandates from large trading partners. Simplify EDI connectivity to major retailers and marketplaces with a solution that is easy to set up and provides a host of benefits that drive business growth.

By transitioning from traditional methods like email or fax to electronic data interchange (EDI), businesses can streamline operations and reap significant advantages. OpenText™ B2B Integration Essentials simplifies and automates supply chain processes, eliminating the need for specialized EDI expertise while reducing costs, accelerating processing, enhancing transaction visibility, minimizing errors, and strengthening relationships with trading partners.

Delivers fast, easy, and affordable connectivity

User-friendly interfaces help organizations seamlessly transition to digital connectivity and quickly onboard trading partners without requiring major resource allocation or additional staff.

Increases transaction visibility

Gain comprehensive transaction visibility and reduce errors in a single platform. Validate documents, access detailed reports, and receive smart alerts to optimize inventory planning, sales forecasting, and other business operations.

"The team at OpenText is very knowledgeable, approachable, and was very helpful during the setup and since in providing support. We also feel assured that due to its global reach and scale, OpenText will be there today, tomorrow, and well into the future to support us."

Richard Nuttall
Senior Plant Manager,
Nichirin U.K.Limited

Reduce manual work and speed order-to-cash

The user-friendly interface is designed to reduce the learning curve and improve overall efficiency. Automated workflows leverage data enrichment and reusability to streamline the document creation process and intelligent automated packing allows vendors to efficiently follow trading partner packing requirements.

Provides advanced supply chain capabilities

Eliminate unnecessary steps with advanced supply chain features. Cross-docking and drop shipping streamline the shipping and receiving process while enhanced pick and pack supports more complex and efficient mixtures of goods in a given shipment. Additionally, the platform supports retailer-friendly features, such as allowing retailers to select delivery slots and receive electronic confirmation, meeting the evolving demands of the retail industry.

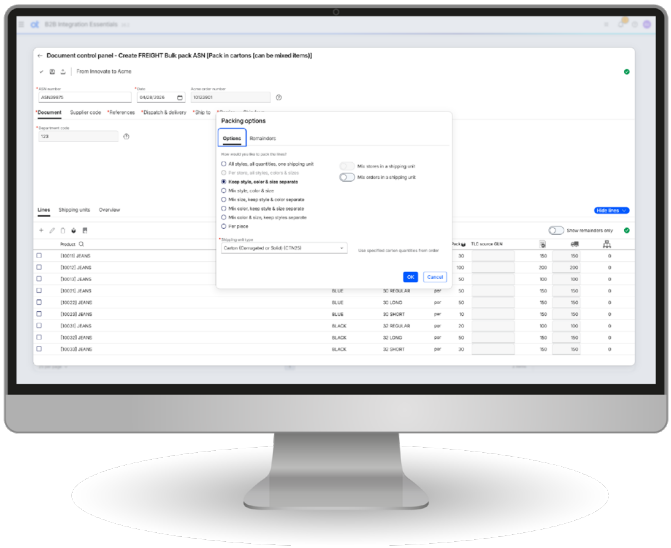

Ensures EDI compliance with any partner

To ensure compliance, our platform is designed to handle more than 85 EDI document formats, including X12, EDIFACT, and TRADACOM, and every trading partner kit is developed to follow specific EDI guidelines for accurate, error-free transactions. Our solutions also offer flexible payment options, such as Hub-pay, Spoke-pay, and Hybrid-pay to further accommodate diverse business needs.

Accommodates growth

Expand your business network effortlessly with a library of pre-built trading partner connections. Benefit from ongoing cloud updates and a wide portfolio of additional B2B solutions to help you take full advantage of a growing digital supply chain.

SMBs must meet EDI requirements from a wide range of trading partners. OpenText B2B Integration Essentials simplifies EDI connectivity with cloud-based, automated B2B integration that facilitates the exchange of business documents, such as orders, advanced shipping notices (ASNs), invoices, payments, and more, reducing errors, improving visibility, and ensuring compliance without requiring EDI expertise.

User-friendly experience with multilingual support and online help available to all users.

Why B2B Integration Essentials matters

OpenText B2B Integration Essentials is designed for first-time EDI users and small to medium-sized businesses that need to meet customer mandates quickly without adding IT complexity or headcount. It provides a fast, low-risk way to ensure compliance, automate transactions, and connect with trading partners worldwide. It also provides a strong foundation that customers can confidently scale over time as their volume, partners, and B2B integration needs grow.

Quick to start: Web-based EDI that's fast to deploy—no EDI expertise or IT team needed.

Simple to use One easy interface to work with all your trading partners.

Built-in compliance: Partner rules are handled for you to help reduce errors and chargebacks.

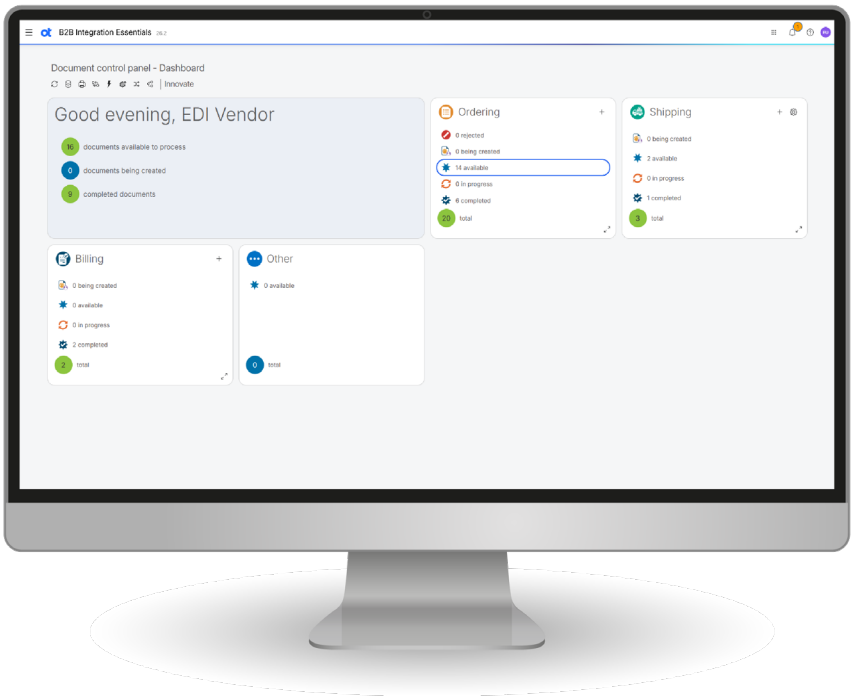

Clear visibility: Get alerts when action is needed and access all documents in one place.

Guided and reliable: Step-by-step workflows and built-in help so teams can work confidently.

Less manual work: Automated documents reuse data to save time and reduce mistakes.

Ship with confidence Packing automation follows partner guidelines automatically

Ready to grow: Seamlessly upgrade to OpenText B2B Integration Foundation as your business scales.
