

Assisted Aviator Review Package

Jumpstart your journey to GenAI
powered eDiscovery the right way

Overview

With legal departments under increasing pressure to resolve litigation and investigation matters quickly, while controlling spending, law firms that can deliver document review at a lower cost and provide earlier and more impactful strategic advice will have a significant competitive advantage. An AI-first approach empowers your firm to deliver better results, without compromising your clients' budgets or timelines. With guidance from OpenText Professional Services experts, you can complete document review projects that previously required large review teams, with comparable quality and a faster turnaround. The result is that your clients save approximately 75 percent over traditional review and get results approximately 88 percent faster, compressing timelines to complete review from months to days. Your litigation team gets the very real benefit of earlier access to key facts to inform case strategy, optimize your strategic value to clients, and differentiate your firm from less tech savvy competitors.

Assisted Aviator Review Package

The pressure is on to bring generative AI into your firm to automate and optimize document review and production of large data sets that frequently exhaust litigation budgets at the outset. Faster, less expensive document review and better early case strategy provide a significant competitive advantage in the marketplace. Unfortunately, it is often hard to know where to begin and the fear of the unknown—does it work, will it be too expensive, what are the risks, how can I tell if the results are accurate and defensible—are stopping even the most sophisticated law firms from taking the first step. OpenText is uniquely positioned to help your firm take that first critical step forward on your generative AI journey.

Assisted Aviator Review is a do-it-yourself fixed fee package for your team to conduct a document review using OpenText™ eDiscovery Aviator™ Review with the assistance of our AI experts. OpenText has developed this Jumpstart Package to help customers get over the fear of the unknown and demonstrate with hands-on guidance the very real and very significant benefits of leveraging LLMs for this traditionally time-consuming and expensive task. With this package, we provide the guidance and fixed fee cost certainty you need to fearlessly bring the value of LLMs for document review to your clients. Think of it as a GenAI safety net.

With more than a decade of leadership in the technology-assisted review space, OpenText is more than just a technology provider. Our deep bench of eDiscovery experts, including GenAI prompt engineers and technology-assisted review consultants, will help you develop the skills to accelerate the use of GenAI into your review workflows to maximize productivity and reallocate time traditionally spent on labor-intensive first level document review. Together, we dive into your clients' data, working alongside you to refine generative AI review prompts, and design validation workflows to deliver consistent, defensible results without the time and costs associated with traditional document review.

OpenText vision

	Exceed the quality of human review 90+% recall with optimized prompts and workflows
	At a lower cost 75% less expensive than manual review
	Immediately 88% faster

Business outcomes

The potential impact is huge. With this package, you will be taking a critical step in getting your firm ready for AI powered work and learn how to effectively use GenAI and LLMs to optimize document review. Working alongside our AI experts, who have a long history of increasing the efficiency and accuracy of labor-intensive document review using technology-assisted review, you can confidently design and complete an efficient and defensible GenAI document review on behalf of your clients.

Shifting first-level review and even some QC to GenAI not only saves time and lowers costs, it improves review quality by limiting the dependency on large review teams, which often deliver inconsistent review results. Leveraging OpenText eDiscovery Aviator Review to rapidly complete document review will have a significant impact on your ability to focus and deliver high-value services to your clients while minimizing mundane, lower value work. With the guidance of OpenText legal technology professionals and powerful GenAI-fueled solutions, your team can easily become GenAI-enabled leaders.

Receive tangible benefits

Our Assisted Aviator Review Jumpstart package will allow you to:

- Get up and running in the cloud immediately.
- Build your skill set to master using prompts without assistance.
- Get results and evaluate findings within the first week of activity.
- Be in a stronger position to establish your wider AI roll out strategy.

Your flight plan

This package is a fast, effective engagement that is designed to optimize the success of the project to realize the functionality of the system as quickly as possible and to ensure high performance.

It includes the setup and configuration of OpenText Aviator Review, workflow design, and OpenText eDiscovery database creation in a secure AWS cloud environment. It also covers prompt engineering, dataset configuration (up to 100,000 documents), testing review, post-go-live support, and a final report on the impact of generative AI for legal review. Related per GB data hosting costs within OpenText™ Core eDiscovery are covered under a separate on demand agreement.

Here are some more details:

Project management

- Objectives and implementation alignment
- Define the project team and plan
- Coordinate team schedules
- Weekly status reporting
- Change management for deliverables, as needed

Planning, design, and analysis

- Review requirements and design for Aviator Review implementation
- Participate in Aviator Review and LLM overview training
- Workflow design session and Aviator Review best practices

Build and configure

- Create an OpenText eDiscovery instance in the AWS secure cloud and import the dataset
- Enable and configure OpenText eDiscovery Aviator Review
- Configure a defined dataset of up to 100,000 documents

Implementation

- Assist with prompt engineering and tuning techniques
- Submit dataset through Aviator Review

Results walkthrough

- Conduct walkthrough session to review process and results
- Ongoing customer assistance during access period

Final report and deliverable

- Deliver detailed report of Aviator Review results
- Present final results

Proposed next steps

Now is the time to start your firm's GenAI transformation journey with OpenText. Leverage generative AI to embrace new approaches to interacting with your clients' data and to extract knowledge to empower your team to work smarter and optimize value.

We take the guesswork out of AI. Our experts in legal technology and eDiscovery work with law firms every day helping them automate litigation and investigation processes and workflows. We can help you uncover key facts faster and perform activities at an accelerated pace. Unlock the full potential of AI with OpenText eDiscovery Aviator today. Fasten your seatbelt and prepare for takeoff.

Additional related services

Successful project execution depends on good communication and partnership between OpenText and customer. Additional services such as product training of technical staff or business users may be implemented as an add-on service.

OpenText Learning Services can accelerate knowledge and skills with OpenText best practices to maximize the value of deployments and ongoing operations. OpenText's comprehensive education programs are designed to meet the needs of all OpenText users. The goal is to help users develop both the technical know-how and the creative vision it takes to meet their most demanding business challenges.
