

# OpenText ZENworks Service Desk version comparison

OpenText™ ZENworks Service Desk is a complete, ITIL-based ITSM help desk system that equips staff to easily monitor and solve service issues, minimizing disruption and freeing them to focus on core business. Establish an online support system that meets the service requirements of customers, administrators, supervisors, and technicians. Enterprise Store provides customer self-help along with request tracking of all types, asset management, and integration with other systems (ZENworks, AMIE®, PSS, Microsoft 365®, etc.).
