

OpenText Documentum Content Management version comparison chart

Modernizing isn't just a technical upgrade—it's a strategic enabler for your business.

Ready to start thinking differently about your content? Upgrading to OpenText™ Documentum™ Content Management empowers you to modernize and optimize your system, unlocking extended value with cutting-edge capabilities. Shift from WebTop to a user-friendly, personalized interface that simplifies navigation. Each new version enhances how teams access, collaborate on, and harness structured and unstructured content. Retaining the ability to manage high volumes with robust security, this unified solution streamlines upgrades, enhances the administrator and user experience, and helps you unlock hidden value. Use this comparison chart to see how AI accelerates productivity, deeper integrations streamline operations, and expanded automation speeds up daily tasks.

Product feature	Benefits	25.x	24.x	23.x
AI workflow automation	Speed decisions and cut manual work with AI that reads documents, fills in metadata, and automated workflows from assisted tasks to fully autonomous AI decision making.	✓		
Business Workspaces	Quickly create new workspaces that organize content, data, people and related tasks in a simple-to-digest view	✓		
Cloud co-authoring	Accelerate teamwork and productivity with direct content authoring and editing using Microsoft 365® cloud co-authoring	✓		
Admin console	Simplify administration and boost efficiency with a modern, unified console that replaces multiple tools in one intuitive interface	✓		
Relationships	Gain greater flexibility and precision with properties defined directly on relationships	✓		
OpenText™ Content Aviator™	Gain valuable insights and find business content faster with an AI-powered content assistant	✓	✓	
AI-enabled workflow insights	AI-driven actionable insights at every step for streamlined decisions	✓		
Chat viewing enhancements	Unlock fast data insights with multi-document summaries, references, and chat in one enhanced view	✓		
Workflow visual indicator icon	Instantly know if a document is linked to a workflow, enhancing efficiency	✓		

Product feature	Benefits	25.x	24.x	23.x
Reporting insights	Faster insights for managers during audits	✓		
Mobile biometrics	Mobile biometrics enable quick, password-free access with a simple scan or gesture	✓	✓	
Coachmarks	Help your new users navigate the mobile app with a self-paced guided tour	✓	✓	
Mobile imaging	Make on-the-go work fun with easy scan, upload, QR Code, and barcode reading right at your fingertips	✓	✓	✓
Mobile digital signatures	Simplifies compliance with ink-like digital signatures, auto-managing signed documents and audit trails to meet regulations	✓	✓	✓
Enabling graphics for easier navigation	Intuitive, visually appealing interface with tailored icons and formatting for easier navigation and content management	✓		
Rich text editor	Personalized markup boosts productivity for knowledge workers	✓		
Recycle bin	Peace of mind with easy recovery of deleted items, minimizing data loss	✓		
Multi-package support:	Greater flexibility in organizing and processing multiple documents during workflows, with mid-step modifications	✓		
Branch office caching services	Empowering remote operations with instant, offline access to critical materials	✓	✓	
One-click deployment	Reduced upgrade time and effort	✓	✓	✓
Simplified certification matrix	Takes away the guesswork when upgrading	✓	✓	✓
Smart View personalization	Sticky memory saves users' personalized column sizes and view preferences, streamlining list and grid mode switches for effortless future sessions	✓	✓	✓
Classic Custom Dialog plugin replacement	Move the Classic Custom Dialog plugins with no modification or replication needed	✓	✓	✓
Modern licensing	Simplify years of license buildup with a modern, consolidated single-model licensing structure.	✓	✓	✓
CAD drawing compare	Easily compare CAD drafts by switching between individual, side-by-side, or overlaid views with highlighted differences for efficient analysis	✓	✓	✓

Product feature	Benefits	25.x	24.x	23.x
Document compare	Quickly compare text on a document from one version to the other, making updates quick and easy	✓	✓	✓
Microsoft 365 integration	Connects people, content and tools to keep teams engaged and productive	✓	✓	✓
Microsoft Teams® integration and security mapping	Provide secure, simplified co-authoring on Documentum content within Teams makes it easier to collaborate	✓		
Microsoft Purview Integration	Enhanced security with sensitivity labels, user-defined permissions, and protected mail search	✓	✓	
CMIS API extensions	Enables SAP S/4HANA® integration for seamless Business Workspace connections	✓		
Accessibility update	Improved support for users with accessibility needs via WCAG compliance	✓		
Secret Vault – extra layer of protection	Boosts data security by integrating with HashiCorp Vault, using mapped keys to manage secret access and protect encrypted files from hackers	✓	✓	
HELM chart optimization	Minimizes manual errors with global portfolio settings	✓	✓	
New advanced search	Delivers fast, accurate search via a machine-learning engine, modern web interface, and scalable containerized architecture, supporting multiple languages, advanced searches, and NAS, SAN, CAS, and Cloud-Store/SDS integrations	✓	✓	✓
Search migration efficiencies	Faster migration with secure indexing, surfacing only designated MIP labels for better security	✓		
Smart View SDK	External widget ensures seamless client integration with real-time updates and dynamic visibility, simplifying custom dashboard and app migration.	✓	✓	✓
External transaction user licenses	Empower external users to perform self-service transactions on secure content from anywhere	✓	✓	✓
