Integrations for the way you work	8

Information management is at the heart of modern work.

Maintaining pace with constantly evolving demands requires agility, scalability, and resilience. OpenText™ Content Management (Extended ECM) provides an agile information management foundation that deeply integrates content with the business processes that power your organization.

With OpenText Content Management, teams are empowered to create, consume, and share information to make insightful decisions, deliver best-in-class service, and boost operational efficiency.

OpenText Content Management plans are purpose-built to address the most common use cases, making content management easy to buy, deploy, and operate—and allowing you to focus on what's most important to your organization. The three turnkey plans provide all the benefits of cloud wherever you deploy.

Want to achieve compliance and team productivity? The Express (X1) Plan features ready-to-use business scenarios, integration with Microsoft 365®, automated security and governance, and best-in-class content management.

Working toward operational excellence across your organization? The Premium (X2) Plan features all the functionality of the Express (X1) Plan, boosted by deep integration with business applications (SAP S/4HANA®, SAP SuccessFactors®, Salesforce®, and Guidewire®).

Or perhaps you wish to share information outside enterprise boundaries with partners and customers? The Ultimate (X3) Plan adds on to the functionality of the Premium (X2) Plan, also including OpenText™ Core Capture for intelligent filing of documents, OpenText™ Core Share for secure content sharing (both internally and externally), and OpenText™ Core Signature for secure business transactions.

OpenText Content Management plans are available as customized or standardized private cloud plans, or standardized off-cloud license plans, and are scalable to meet your needs now and in the future.

Modernize with OpenText Content Management plans

Express (X1) Plan

Achieve compliant team productivity

Best-in-class content management including integration with Microsoft 365, automated security and governance and more

Premium (X2) Plan

Drive operational excellence via deep integration with business processes

All of the benefits of Express (X1) plus document generation and ready-to-use integrations for SAP S/4HANA, SAP SuccessFactors, Salesforce and Guidewire

Ultimate (X3) Plan

Share information outside enterprise boundaries with partners and customers

All the strength of Express (X1) and Premium (X2) plus OpenText Core Capture, OpenText Core Share and OpenText Core Signature

OpenText Content Management private cloud plans

Private cloud plans are designed for enterprises that want content management as a cloud service. Standard Express (X1), Premium (X2), or Ultimate (X3) plans are available or custom plans can be designed to meet specific needs. Capacity, function, and metric cloud extensions can also be added.

Capacity	Express (X1): Boost team productivity	Premium (X2): Build cross-functional excellence	Ultimate (X3): Bridge across boundaries
	Best-in-class content services platform with ready-to-use business scenarios, integration with Microsoft 365, viewing, and automated security and governance.	All the benefits of Express (X1)—plus automated document generation and ready-to-use integrations for SAP S/4HANA, SAP SuccessFactors, Salesforce, and Guidewire.	All the benefits of Premium (X2)—plus OpenText Core Capture (with intelligent filing), OpenText Core Share for seamless content exchange with external parties and OpenText Core Signature to fully digitize business transactions.

Optional cloud plan extensions

Functional extensions	OpenText Content Management for Engineering Capabilities for capital project management.	OpenText Content Management for Government Capabilities to serve complex process management or case management requirements.	OpenText Content Management for Life Sciences Provides services to support GxP requirements for cloud solutions used by life sciences.
	OpenText Content Management with Content Aviator Boost productivity with a secure, context-aware AI content assistant.	OpenText Content Management with media management Seamlessly stream, annotate and clip video and audio files as a part of a business process.	OpenText Content Management with document control Automate controlled document lifecycles with secure, auditable workflows.
Metric extensions	OpenText™ Content Management for SAP® SuccessFactors® Improve employee experience and human resources productivity by managing documents within an Employee Workspace. Includes Premium (X2) functionality with integration to SAP SuccessFactors. Note, unlike Premium (X2), this plan is limited to this single use case.	External transactions Provide simple portal access to content stored in OpenText Content Management to customers, partners, or suppliers. A transaction is a download, upload, display, or print of a single document.	
Capacity extensions	Additional non-production instance Additional system instances for testing or training purposes.	Additional document storage Additional document storage capacity.	

OpenText Content Management license plans

OpenText Content Management license plans are for organizations that want to install and operate the solution in their own data centers or on other hyperscalers. Only Express (X1) and Premium (X2) plans are available with the option to add functional, cloud-service, and metric extensions.

Capacity	Express (X1): Boost team productivity	Premium (X2): Build cross-functional excellence
	Best-in-class content services platform with ready-to-use business scenarios, integration with Microsoft 365, viewing, and automated security and governance	All the benefits of Express (X1)—plus, automated document generation and ready-to-use integrations for SAP S/4HANA, SAP SuccessFactors, and Guidewire.
