Leader
in dynamic data masking

Voltage SecureData Servers helps customers retain control of their data security across various industries.

Finance

SIX

SIX's regulators require them to apply a strict "need to know" principle. OpenText's technology enabled SIX to "encrypt data at the source" to address privacy compliance.

Major Financial Services Corporation

With some of this client's largest databases holding more than **one billion records**, Voltage SecureData Servers helps navigate a complex and distributed environment to protect sensitive data in test cases.

Healthcare & Insurance

Large Healthcare and Insurance Organization

Voltage SecureData Servers helps this client protect sensitive data from a breach while leveraging the power of cloud-based analytics across **150+ distributed applications**.

Telecommunications

Swisscom AG

Swisscom rapidly leveraged OpenText's enterprise-ready Encryption as a Service solution to protect **10 million customer records** at risk of cyberattack.

Retail

Multi-National Pharmacy Retailer

With **hundreds of millions of online transactions each year**, Voltage SecureData Servers' format-preserving technology enables this client to run secure data analytics for strategic decision-making.

Multinational Retail Organization

OpenText Privacy and Protection Foundation secures **7+ million cloud-hosted customer records** for this retail organization, so that data is only ever exposed when required.

Software & Technology

Leading Provider of Business Processing Services

Before OpenText, this client's product managers could not access data. Now they can, and are using the data in its protected form to **drive insights** without exposing any sensitive data.

Retain control of your data security with Voltage SecureData Servers
