

Assisted Aviator Review Package

Jumpstart your journey to GenAI
powered eDiscovery the right way

Overview

Document review typically comprises 75 percent or more of total discovery costs. With an AI-first approach, the OpenText Professional Services team can help you complete the same task previously completed by a human review team with comparable quality, lower costs, and a faster turnaround, saving approximately 75 percent over traditional review and delivering results approximately 88 percent faster—compressing timelines to complete review from months to days.

Assisted Aviator Review Package

The pressure is on to bring generative AI into your legal department to automate and optimize document review and production of large data sets—traditionally the most time and labor intensive and expensive aspects of eDiscovery.

Unfortunately, it is often hard to know where to begin and the fear of the unknown—does it work, will it be too expensive, what are the risks, how can I tell if the results are accurate and defensible—are stopping even the most sophisticated legal departments from taking the first step. OpenText is uniquely positioned to help legal departments take that first critical step forward on their generative AI journey.

Assisted Aviator Review is a do-it-yourself fixed fee package for your team to conduct a document review using OpenText™ eDiscovery Aviator™ Review with the assistance of our AI experts. OpenText has developed this Jumpstart Package to help customers get over the fear of the unknown and demonstrate with hands-on guidance the very real and very significant benefits of leveraging LLMs for this traditionally time-consuming and expensive task. With this package, we provide the guidance and fixed-fee cost certainty you need to fearlessly explore the value of LLMs for document review. Think of it as a GenAI safety net.

With more than a decade of leadership in the technology-assisted review space, OpenText is more than just a technology provider. Our deep bench of eDiscovery experts, including GenAI prompt engineers and technology-assisted review consultants, will help you develop the skills to accelerate the use of GenAI into your review workflows to maximize productivity and cut unnecessary time and costs. Together, we dive into your data, working alongside you to refine generative AI review prompts, and design validation workflows to deliver consistent, defensible results without the time and costs associated with traditional document review.

OpenText vision

	Exceed the quality of human review 90+% recall with optimized prompts and workflows
	At a lower cost 75% less expensive than manual review
	Immediately 88% faster

Business outcomes

The potential impact is huge. With this package, you will be taking a critical step in getting your legal team ready for AI-powered work and learn how to effectively use GenAI and LLMs to optimize document review. Working alongside our AI experts, who have a long history of increasing the efficiency and accuracy of document review using technology-assisted review, you can confidently design and complete an efficient and defensible GenAI document review.

Leveraging OpenText eDiscovery Aviator Review to reduce review costs will have a significant impact on overall litigation costs. But the benefits don't end with time and cost savings. Shifting review to GenAI improves review quality by limiting the dependency on large review teams that often deliver inconsistent review results. By helping legal teams identify key evidence earlier in the process and enabling resource reallocation to higher-value tasks, such as legal strategy, early case assessment, and business counseling, the shift to GenAI review not only increases legal's value to the broader business but also supports the department's strategic mandate to modernize operations through responsible AI innovation.

Receive tangible benefits

Our Assisted Aviator Review Jumpstart package will allow you to:

- Get up and running in the cloud immediately.
- Build your skill set to master using prompts without assistance.
- Get results and evaluate findings within the first week of activity.
- Be in a stronger position to establish your wider AI roll out strategy.

Your flight plan

This package is a fast, effective engagement that is designed to optimize the success of the project to realize the functionality of the system as quickly as possible and to ensure high performance.

It includes the setup and configuration of OpenText Aviator Review, workflow design, and OpenText eDiscovery database creation in a secure AWS cloud environment. It also covers prompt engineering, dataset configuration (up to 100,000 documents), testing review, post-go-live support, and a final report on the impact of generative AI for legal review. Related per GB data hosting costs within OpenText™ Core eDiscovery are covered under a separate on demand agreement outside the scope of this package.

Here are some more details about the package and solution implementation:

Project management

- Objectives and implementation alignment
- Define the project team and plan
- Coordinate team schedules
- Weekly reporting status
- Change management for deliverables, as needed

Planning, design, and analysis

- Review requirements and design for Aviator Review implementation
- Participate in Aviator Review and LLM overview training
- Workflow design session and Aviator Review best practices

Build and configure

- Create an OpenText eDiscovery instance in the AWS secure cloud and import the dataset
- Enable and configure OpenText eDiscovery Aviator Review
- Configure a defined dataset of up to 100,000 documents

Implementation

- Assist with prompt engineering and tuning techniques
- Submit dataset through Aviator Review

Results walkthrough

- Conduct walkthrough sessions to review process and results
- Ongoing customer assistance during access period

Final report and deliverable

- Deliver detailed report of Aviator Review results
- Present final results

Proposed next steps

Now is the time to start your GenAI transformation journey with OpenText. Leverage generative AI to embrace new approaches to interacting with your data and to extract knowledge to empower your users to work smarter.

We take the guesswork out of AI. Our experts in legal technology and eDiscovery work with enterprise legal teams every day helping them automate litigation and investigation processes and workflows. We can help you uncover key facts faster and perform activities at an accelerated pace. Unlock the full potential of AI with OpenText eDiscovery Aviator today. Fasten your seat belt and prepare for takeoff.

Additional related services

Successful project execution depends on good communication and partnership between OpenText and client. Additional services such as product training of technical staff or business users may be implemented as an add-on service.

OpenText Learning Services can accelerate knowledge and skills with OpenText best practices to maximize the value of deployments and ongoing operations. OpenText's comprehensive education programs are designed to meet the needs of all OpenText users. The goal is to help users develop both the technical know-how and the creative vision it takes to meet their most demanding business challenges
