

# LLM Discovery Workshop

Learn how your organization can leverage large language models (LLMs) and generative AI for success

## Benefits

- Identify where to begin your journey
- Develop a comprehensive AI strategy
- Discuss how to minimize risk and investment while keeping data secure
- Gain actionable insights to start your journey

Large language models (LLMs) are AI's breakthrough in understanding and generating human language, revolutionizing information processing, customer engagement, and task automation across industries. With LLMs, organizations can gain a competitive edge with faster insights and enhanced operational efficiency. However, understanding what LLMs can do and how to use them can be complicated.

Join OpenText consultants for a two-day LLM Discovery Workshop. We will provide an overview of what's available and how this technology is being used to gain efficiency, increase productivity, and save money. Together, we will identify use cases specific to your industry and explore the practical application of these solutions. Finally, we will discuss techniques for preparing your data to get the best results from generative AI.

Whether you're a business leader, decision maker, or content manager, this workshop promises invaluable insights and a glimpse into AI-driven language understanding.

## Identify where to begin your journey

Start by learning the basics of what language models are and how they work. Gain a solid understanding of their capabilities and how your business can take advantage. Identify which tools are right for your specific needs and explore common concerns including accuracy, privacy, security, and bias.

## Develop a comprehensive AI strategy

Together, we'll identify and assess use cases tailored to your specific business and data requirements. We'll outline processes for identifying data sources and preparing them for analysis. Our experienced consultants can assist in evaluating potential ROI and constructing compelling investment cases. Current data constraints will be addressed to ensure a comprehensive approach.

## Discuss how to minimize risk and investment while keeping data secure

Next, we'll identify a clear, achievable business objective that can be easily measured. Through actionable insights gathered in this initiative, the process can be replicated and scaled effectively, while also minimizing risks and optimizing investment strategies for sustainable growth.

## Gain actionable insights to start your journey

At the conclusion of the two-day workshop, you will leave with the following:

- Workshop summary with actionable insights
- AI-data maturity matrix
- Documented use cases for leveraging generative AI and LLMs

## Have full confidence in OpenText

Embrace the future and accelerate your growth. Enroll in our workshop on LLMs and embark on a journey towards mastering transformative AI technologies. Equip yourself with the skills to drive innovation and lead in your industry.
