

OpenText Launch Service

Speed, simplify, and enhance onboarding to OpenText Core Archive for SAP® Solutions

Benefits

- Go live faster
- Minimize business disruption
- Leverage full-service integration
- Trust the experts

Business documents are the foundation of business-relevant transactions in any SAP® system. Many organizations require a scalable, regulatory compliant, secure, and reliable repository for retention of digital business documents over many years. Additionally, organizations face increasing pressure to improve, simplify, and reduce the cost of IT by using Software as a Service solutions.

Clients can quickly benefit from integrating with OpenText™ Core Archive for SAP® Solutions, which meets all of those requirements. OpenText Professional Services delivers this integration to an existing SAP system with this onboarding engagement.

Go live faster

The OpenText Launch Core Archive for SAP Solutions Service follows a proven methodology to help clients go live rapidly, incorporating learnings and experiences from a vast amount of client projects. As a result, users can archive SAP documents into the new OpenText Core Archive for SAP Solutions Cloud Service quickly.

Minimize business disruption

Clients can benefit from years of experience and intellectual property unique to OpenText. The OpenText design patterns and make for a faster, more predictable implementation with less disruption to business.

"A key area for us was the migration of our existing content, around 27 TB. OpenText was able to clearly show us how the migration could be achieved, with no negative impact on our day-to-day business activities."

Joris Verberckmoes
Head of Delivery and
Operations, Engie Electrabel

Leverage full-service integration

The first part of the engagement is an OpenText Core Archive onboarding workshop, which introduces the OpenText Core Archive for SAP Solutions concept. During this remote workshop, OpenText configures an organization's system landscape and SAP archiving use cases and scenarios.

Next, the OpenText Core Archive for SAP Solutions Connector software is installed and securely connected to OpenText Core Archive for SAP Solutions Cloud Service, as well as SAP systems, following the plan from the workshop. This step can also be performed using a connectorless approach, where applicable.

The SAP Data Archiving Readiness Workshop follows. This concise readiness workshop introduces SAP Data Archiving with OpenText Core Archive, analyses the SAP data to identify archiving opportunities, and delivers clear recommendations and next steps to help confidently plan an archiving strategy.

Initial deployment of OpenText client software, such as Imaging Viewer and Imaging Enterprise Scan, provides enhanced functionality for SAP archiving scenarios. OpenText will install each of these components once to provide administrators with a reference installation for tests and client-software rollout.

Trust the experts

Leverage more than two decades of experience integrating information management solutions with SAP. OpenText Professional Services brings leading practices and lessons learned to guide the team, simplify the design, and maximize the business potential from the OpenText Core Archive for SAP Solutions Connector investment.

Have confidence in a path to content that enables SAP managed business. OpenText experts drive down risk by leveraging their extensive SAP document business process and solution knowledge. As the product vendor, OpenText delivers as one team. Organizations benefit from experts across the company with shared mutual accountability for client success and satisfaction.

OpenText Professional Services is a global organization with more than 4,000 product-certified members exclusively focused on information management solutions.
