Total experience for manufacturing

Embracing a total experience strategy to increase innovation, accelerate time to market, and boost engagement

OpenText Manufacturing solutions empower organizations to transform their industrial operations through intelligent information management and process automation. By leveraging data-driven insights, companies can achieve unprecedented operational efficiency, ensure regulatory compliance, and foster innovation across the supply chain.

Top reasons to choose OpenText Manufacturing solutions

1 **End-to-end visibility:** Gain complete transparency across your manufacturing operations, from product design to delivery, enabling proactive decision-making and rapid response to market changes.

2 **Enhanced supply chain resilience:** Build robust supplier networks through advanced analytics and collaborative tools that identify vulnerabilities and provide contingency options during disruptions.

3 **Regulatory compliance automation:** Streamline adherence to industry regulations with automated documentation management, audit trails, and validation processes that reduce compliance costs by up to 30%.

4 **IoT integration capabilities:** Connect shop floor equipment and systems seamlessly, transforming operational data into actionable insights that minimize downtime and optimize production schedules.

5 **Digital twin technology:** Create virtual representations of physical assets to simulate performance, predict maintenance needs, and test process improvements without disrupting actual operations.

6 **Workforce empowerment:** Equip employees with mobile-accessible knowledge bases, augmented reality guidance, and collaborative tools that accelerate onboarding and boost productivity.

7 **Sustainable manufacturing support:** Implement resource optimization algorithms and waste reduction tracking that cut costs and advance environmental stewardship goals.
