

Why supply chains need EDI and APIs

Modern supply chains are under pressure from all sides—evolving e-Invoicing regulations, diverse partner requirements, and a mix of outdated and modern communication protocols.

To get ahead, companies need to streamline supply chain operations while leveraging both EDI (electronic data interchange) and APIs (application programming interfaces) so they can innovate for growth and be more resilient.

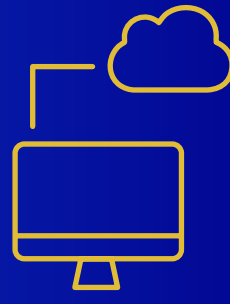

The power of EDI

- Structured, standardized data exchange (e.g., invoices, POs)
- Ideal for high-volume, stable transactions
- Globally recognized formats (EDIFACT, ANSI X12, etc.)
- Ensures security, accuracy, and compliance

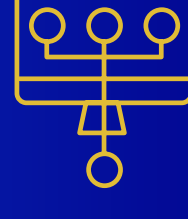

Connects with the agility of APIs

- Real-time, flexible data sharing
- Perfect for dynamic tasks like live shipment tracking
- Seamless integration with cloud apps, CRMs, ERPs
- Enhances transparency and responsiveness

Providing “best of the best” B2B integration

- Combines EDI’s reliability with API’s speed
- Achieves end-to-end visibility and scalability
- Adapts to partner tech maturity and market changes

An integrated EDI and API strategy offers a powerful combination of **stability and agility**, so you can operate your supply chain more **efficiently and respond faster** to market demands.

OpenText B2B Integration EDI-to-API Adapters

OpenText™ **Business Network Cloud** and **B2B Integration** solutions enable seamless integration with both EDI and APIs, fast tracking integration regardless of technology and laying the groundwork for end-to-end supply chain visibility. With OpenText you get:

- Pre-built adapters for Microsoft Dynamics 365, Oracle NetSuite, Oracle Fusion, and SAP S/4HANA.
- Support for all size businesses from SMBs to global enterprises.
- Onboarding and implementation with experienced EDI experts
- Integrate EDI data into any ERP, providing users with real-time transaction status directly within your current system
- A unified digital backbone that connects once to everything, using the world’s largest B2B network of 1M+ trading partners
