

## PRODUCT OVERVIEW

# OpenText RightFax

Improve productivity and efficiency, reduce costs and optimize business processes

**Eliminates** inefficiencies, drives competitive differentiation and improves the bottom line

**Reduces** cost and maximizes productivity by digitizing manual, paper-based information exchange

**Increases** productivity by integrating with email and desktop applications

**Ensures** compliance with customer, industry and data privacy mandates

**Business systems (EMR, ERP, ECM) produce and consume content that needs to be securely delivered to specific recipients while maintaining regulatory compliance. Successful organizations understand this and are adopting robust information flows to optimize their processes and increase the speed and security of their business. However, without the right tools, process optimization can potentially fail to deliver optimum results.**

Fax is a principal component of content-centric workflows. OpenText™ RightFax™ offers a powerful, enterprise-grade digital fax solution that integrates with the enterprise applications that drive business processes to maximize productivity, reduce risk and decrease costs.

For almost 40 years, RightFax has been the most flexible and configurable fax server available, with advanced security, unmatched reliability and integration and automation capabilities that make it the most trusted choice for enterprises worldwide.

## Premier Medical Group enhances security, service and speed of health information exchange

*“Cost is one of the most important differentiators because, at the end of the day, people count every penny. The OpenText solution was far more cost effective.”*

Dr. Sunny Maheshwari  
Executive Board Director  
Premier Medical Group

## Support digital transformation and modernization initiatives

RightFax helps transform fax-dependent workflows, especially those related to interactions with customers and other stakeholders, to eliminate inefficiencies, drive competitive differentiation and improve bottom-line results.

## Reduce cost

By digitizing manual, paper-based information exchange, organizations can reduce errors and the costs to resolve them and enable digital, paperless faxing to maximize productivity.

## Increase user and workflow productivity

RightFax integrates with email and desktop applications for fast and easy electronic faxing in users' familiar environments.

## Ensure compliance

With RightFax, organizations can comply with customer, industry and data privacy mandates and improve security and auditability of messaging and information access.

## Decrease time to revenue and increase customer satisfaction

Consistent, reliable and secure fax communications increase the speed of transactions to improve customer satisfaction. Organizations can integrate with enterprise applications and automate paper-based, manual fax processes to shorten business cycles.

---

For more than three decades, RightFax has been the most trusted leader in enterprise fax and secure messaging and is the only fax server with comprehensive deployment options to meet today's needs and evolve as needs change. Available fully on-premises, as a hybrid fax deployment or as a managed service, RightFax redefines and modernizes secure fax to reduce risk, improve integrations to back-end systems and increase efficiency.
